TAILWYNDZ Propel

Fueling Futures, Powered by Tailwyndz.

About Tailwyndz

- Tailwyndz is a forward-looking technology company committed to building user-centric and context-driven solutions that enable enterprises to make smarter, data-driven decisions.
- Tailwyndz has grown into a trusted partner for organizations seeking innovation, efficiency and sustainable growth. With offices in the United States (Frisco, TX; West Nyack, NY) and India (Chennai), we bring together a global perspective with domain expertise to deliver measurable impact for our clients.

Introducing Tailwyndz Propel

- At Tailwyndz, we believe that talent needs the right push to take flight. Our flagship internship program – **PROPEL** – is designed to accelerate your learning journey, fuel your curiosity and prepare you for the future of data-driven innovation.
- **Propel!** It is more than just an Internship. It is a launchpad where bright minds become Propellers – individuals who drive ideas forward, explore possibilities fearlessly and navigate real-world challenges with confidence.

- Over the course of **eight weeks**, you will gain hands-on exposure to most of the data and AI lifecycle - from engineering scalable pipelines to building intelligent models and translating insights into impact. This holistic approach ensures that every Propeller graduates with a well-rounded foundation across modern data and AI practices.

Propel Pathways

- The Propel is designed as an immersive program where learning meets application, turning knowledge into impact. You will experience the synergy of data engineering, data science and analytics - the core pillars of intelligent enterprises.
- Through Propel, you will gain exposure to how these domains integrate and complement each other, fostering both technical depth and strategic perspective.

What we look for

We are searching for talented, curious and ambitious Propellers who are eager to take on real-world AI and data challenges. The ideal candidate brings:

- A passion for AI/ML and data-driven problem-solving
- Strong analytical and critical-thinking skills
- Coursework or projects in Data Science, Data Engineering.
- Excellent communication, collaboration and adaptability

What you will do at Tailwyndz

As a Propel Intern, you will gain hands-on exposure to a wide range of tasks, some of them are:

- Work on AI/ML practical usecases
- Research emerging algorithms, frameworks and methods to fuel our innovation pipeline
- Develop interactive dashboards and reports to present insights
- Build and optimize data pipelines using PySpark, Databricks, Dataiku and cloud technologies
- Contribute to knowledge bases and documentation for lasting organizational impact

Must-Have Qualifications

- Currently enrolled in an undergraduate program in Computer Science, Artificial Intelligence, Statistics, Big Data Analytics, Operations Research or a related discipline.
- Proficiency in Python and SQL, with the ability to apply them to practical problem-solving.
- Solid grounding in statistics, regression, time-series forecasting and fundamental machine learning concepts.
- Strong communication skills, coupled with an analytical and solution-oriented mindset.

Nice-to-Have Qualifications

- Prior Internship experience or academic projects in AI, supply chain forecasting or related domains.
- Working knowledge of cloud platforms such as AWS, GCP or Azure.
- Familiarity with data visualization tools including Power BI or Tableau.
- Exposure to enterprise applications or business process design.

"Together, let's build, explore and navigate the future of data."
