TRINGAPPS — Company Profile

Who Is Tringapps?

- **Industry:** Software Development
- **Headquarters:** New York, USA
- **Founded:** 2007
- **Employees:** 2,000+ across 10 global locations
- **India Presence:** Including Chennai

Tringapps describes itself as a pioneer in building state-of-the-art SaaS products serving worldwide audiences, with a focus on innovation and next-generation digital products.

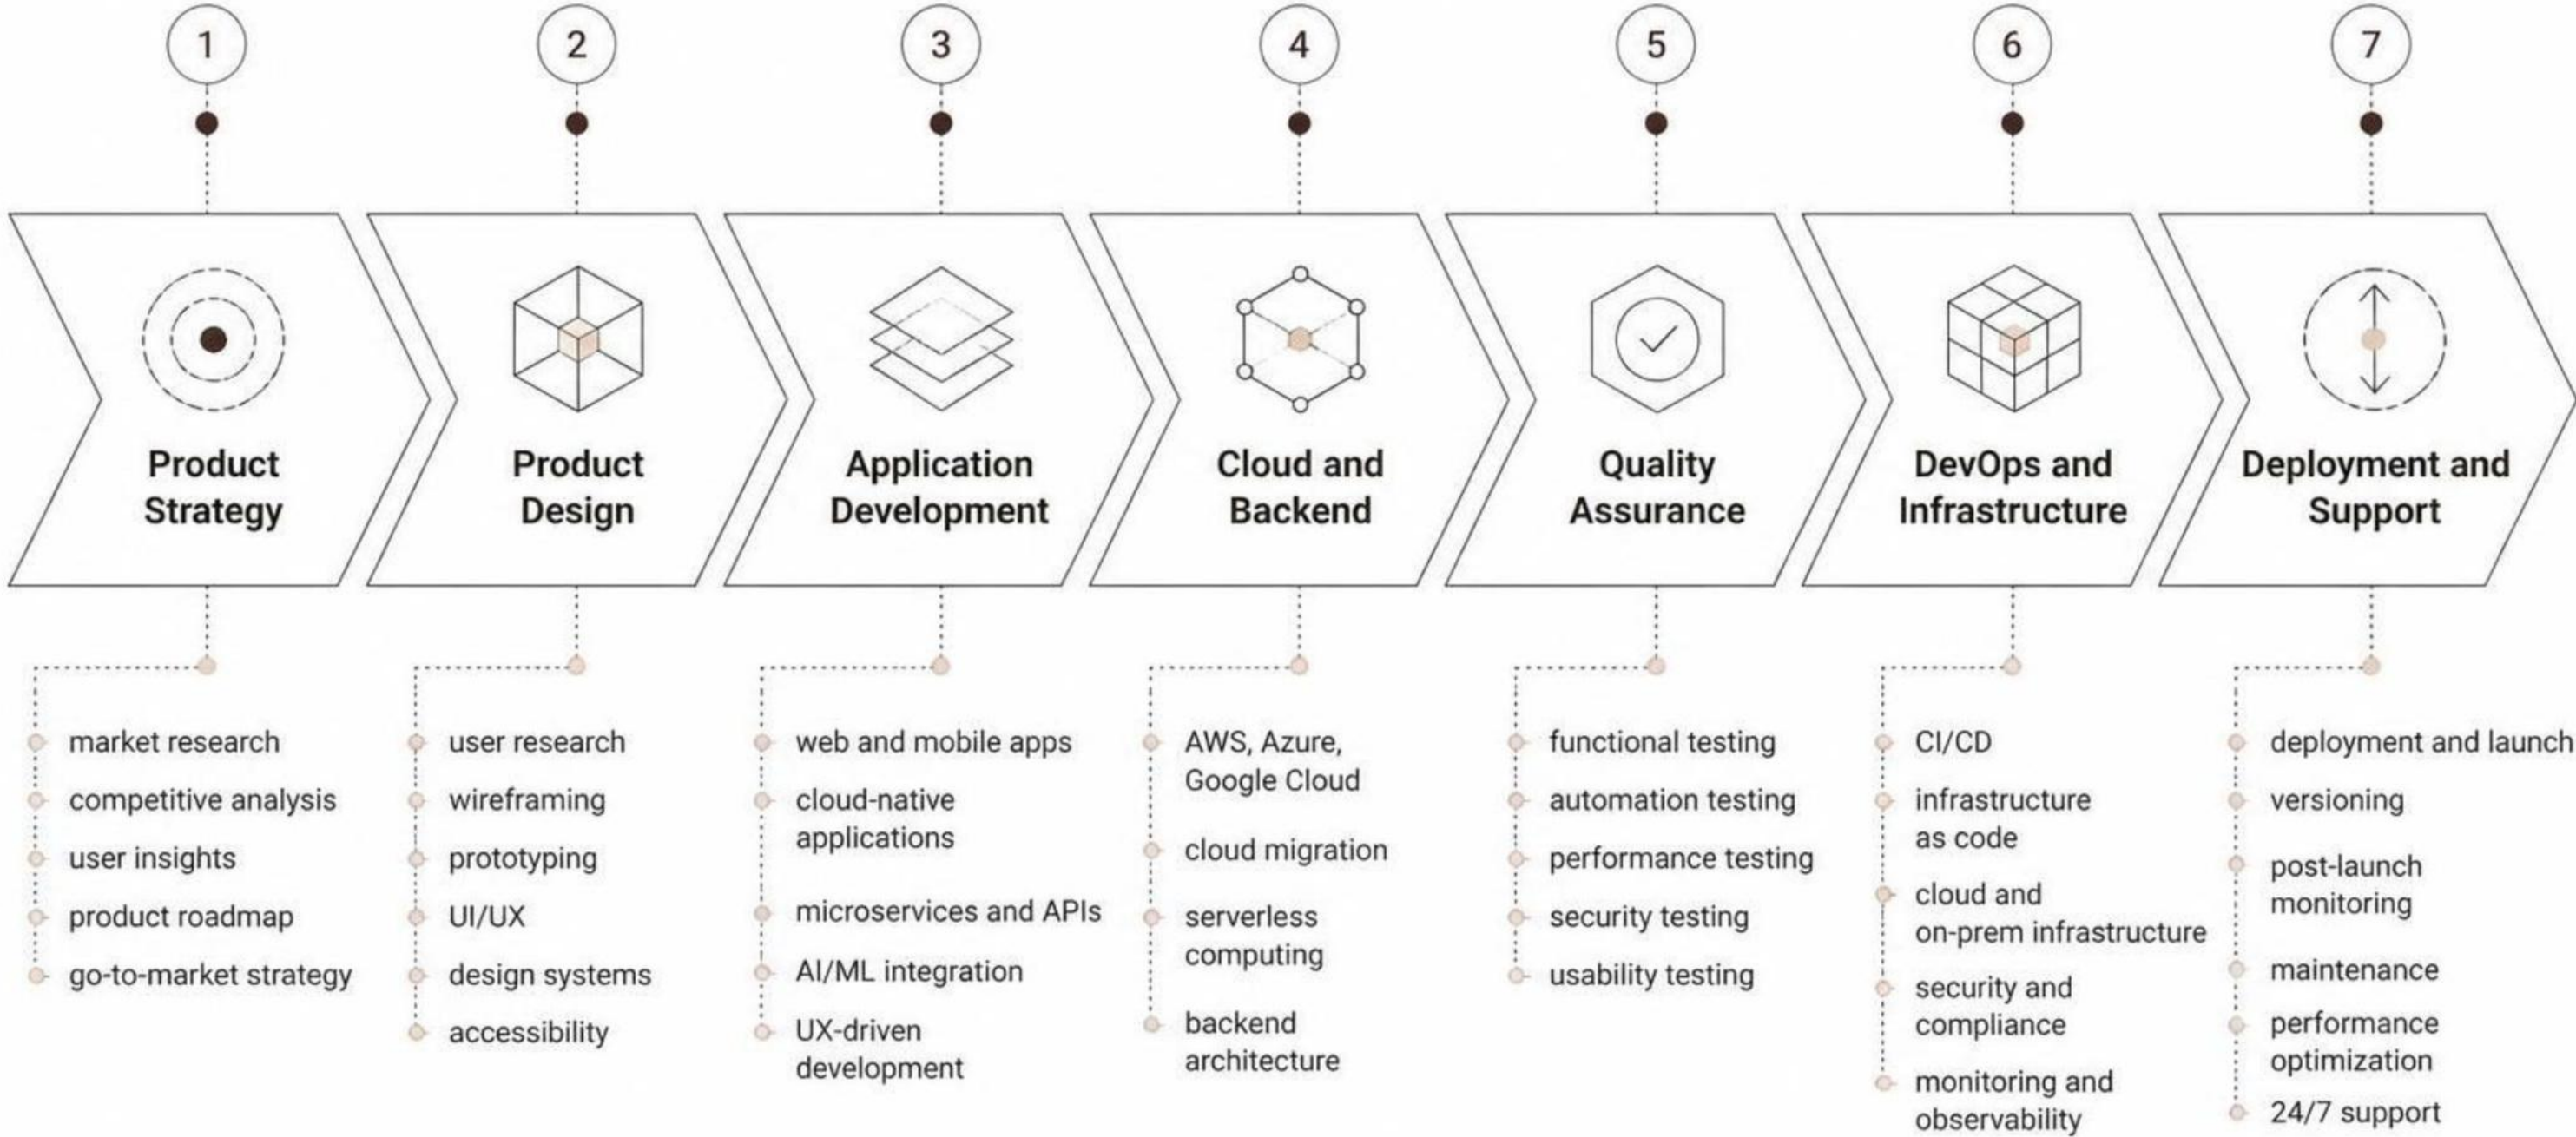

Our Journey

Documented product experience includes **Associated Press** mobile applications, **HBO Max**, and **Disney+**.

End-to-End Product Engineering

Tringapps delivers the complete product lifecycle — from initial strategy through deployment and ongoing support — ensuring seamless, high-quality digital product delivery at every stage.

Technology & Service Expertise

Tringapps brings deep expertise across four major technology domains, enabling comprehensive digital product development and transformation for enterprise clients worldwide.

AI & Data

- Artificial Intelligence
- Machine Learning
- Deep Learning
- Data Analytics
- Business Intelligence
- Smart Data
- Neural Networks

Cloud & Engineering

- AWS
- Microsoft Azure
- Google Cloud
- Cloud Applications
- DevOps
- Infrastructure
- Product Engineering

- Mobile Applications
- Web Applications
- UI/UX
- Digital Product Design
- OTT
- Digital Transformation

Business & Industry Technology

- FinTech
- Cybersecurity
- Sales & Commerce
- Guidewire
- Duck Creek
- Digital Marketing
- ADM

Global Digital Product Experience

Industries & Solutions

Media & OTT

Streaming and digital media platforms

FinTech

Financial technology solutions

E-Commerce

Digital commerce solutions

AI & Data

Analytics, automation and intelligent solutions

Cybersecurity

Security and digital resilience

Insurance

Guidewire and Duck Creek solutions

Documented Product Experience

Examples shown in Tringapps' client/product portfolio:

Associated Press · HBO Max · Disney+

Bloomberg · CNBC · Reuters

JPMorgan · Bank of America · Barclays

NBC · GSK · Kimberly-Clark

Why Tringapps?

Comprehensive End-to-End Services

Full product lifecycle from strategy to deployment and support

Customer Centric

Client-focused approach with tailored solutions

Focus on Innovation

Commitment to next-generation technologies and modern engineering

Agile & Iterative Process

Iterative development methodology for faster, higher-quality delivery

Cost Effectiveness & ROI

Efficient delivery models designed to maximize return on investment

Scalable Solutions

Architecture and engineering built to scale with business growth

Built for Quality, Security & Scale

ISO 27001:2022

Information Security Management

ISO 9001:2015

Quality Management Systems

CMMI Maturity Level 5

Optimizing Process Maturity

SOC 2 Type 2

Security & Compliance
Certification

Additional capabilities include: QA Automation · Security Testing · Cloud Security · DevOps Automation · Monitoring & Observability · Scalable Architecture

Build Your Future with Tringapps

Tringapps offers a dynamic technology environment for engineering and technology professionals — combining global product experience with cutting-edge tools and methodologies.

Technology Career Landscape

Software Development

Full-stack and mobile application engineering

Data Analytics

Business intelligence and data engineering

Application Development

Web, mobile, and cloud-native applications

Cybersecurity

Security testing, compliance, and digital resilience

AI / ML

Machine learning, deep learning, and intelligent systems

DevOps

CI/CD, infrastructure automation, and observability

UI / UX

User research, design systems, and accessibility

Product Engineering

End-to-end digital product development

Cloud Computing

AWS, Azure, and Google Cloud platforms

QA Automation

Automated testing and quality engineering

Infrastructure

Cloud and on-premise infrastructure management

Why It Matters for Engineering Students

Exposure to Modern Technologies Work with AI, cloud, and emerging tech in real product environments	Product Engineering Experience Hands-on involvement across the full software development lifecycle
Cloud & AI-Focused Work Contribute to cloud-native and AI-integrated product development	Diverse Technology Domains Opportunities spanning media, fintech, e-commerce, cybersecurity, and more

TRINGAPPS

"Building next-generation digital products with technology, innovation and engineering."
