

Application Engineer Trainee – Configuration Stream

Company Overview

Radiant, founded in 2008, is a global systems integrator focused on enabling and accelerating digital transformation for our clients through the deployment of Enterprise Applications, Business Intelligence Solutions, Enterprise Application Integration (EAI), cloud-based turnkey application development, and Quality Assurance services, including manual and automated testing for functional, security, and performance use cases.

Our headquarters is in Dallas, USA, and our India headquarters is in Chennai, India.

In a nutshell

You will support Radiant's customers during the implementation of next-generation Supply Chain Planning solutions. Working alongside experienced consultants, you will learn customer business processes, understand planning requirements, and help configure and validate enterprise planning solutions that enable smarter and faster business decisions.

The role requires strong analytical thinking, problem-solving ability, communication skills, and a passion for learning business processes and technology.

Selected candidates will undergo a structured training program covering Supply planning, Demand Planning, Retail Planning, Supply Chain fundamentals, consulting methodologies, and the o9 Digital Brain platform before being assigned to customer projects.

What Will You Be Doing?

- Understand customer business processes and planning requirements.
- Participate in requirement gathering workshops and solution discussions.
- Assist in configuring planning solutions on the o9 Digital Brain platform.
- Analyse customer business data to identify trends, inconsistencies, and improvement opportunities.
- Support System Integration Testing (SIT) and User Acceptance Testing (UAT).
- Validate planning results and ensure they align with customer business requirements.
- Prepare functional documentation, process flows, and user guides.
- Collaborate with Integration, Technical, and Quality Assurance teams during project implementation.
- Support customers during deployment, hyper care, and post-go-live activities.
- Continuously learn Retail Planning, Supply Chain Planning, and enterprise planning best practices.

The Ideal Candidate We Are Looking For

Education

- BE / B.Tech (All Engineering streams)
- MBA (Operations, Supply Chain, Business Analytics) is an added advantage

Required Skills

- Strong analytical and logical reasoning skills.
- Good problem-solving ability.
- Excellent verbal and written communication skills.
- Ability to understand business processes and translate them into structured solutions.
- Curiosity and willingness to learn new technologies and business domains.
- Ability to work collaboratively in a team environment.
- Good presentation and interpersonal skills.
- Strong ownership and positive attitude.
- Advanced Excel
- SQL basics
- Python basics
- Supply Chain Management

Preferred knowledge (Not Mandatory)

- Retail Planning
- Inventory Management
- Demand Forecasting
- Business Analytics
- Data visualization concepts
- Querying using MDX

No prior experience with o9 or any Supply Chain Planning platform is required. Training will be provided.

What do you get:

Competitive compensation and benefits.

Exposure to some of the biggest retail and consumer brands in the world.

A structured learning and mentorship program.

Comprehensive training on Retail Planning, Supply Chain Planning, and the o9 Digital Brain platform.

Opportunity to work on global implementation projects.

A collaborative and entrepreneurial work culture.

Excellent career growth opportunities. International exposure through customer engagements.
