

Application Engineer Trainee – (Integration)

Company Overview

Radiant, founded in 2008, is a global systems integrator focused on enabling and accelerating digital transformation for its clients through Enterprise Applications, Business Intelligence solutions, Enterprise Application Integration (EAI), cloud-based application development, and Quality Assurance services, including manual and automated functional, security, and performance testing. Headquartered in Dallas, USA, Radiant's India operations are based in Chennai and Coimbatore.

Role Summary

As an **Application Engineer Trainee**, you will be part of a dynamic team responsible for building and supporting enterprise data integration solutions for global customers using the **o9 Digital Brain**, one of the world's leading AI-powered Supply Chain Planning platforms.

This role offers an exciting opportunity to build a strong foundation in Data Engineering, Enterprise Integration, Cloud Technologies, and Supply Chain Planning while working on large-scale digital transformation projects. Through structured training and mentorship, you will gain hands-on experience with enterprise technologies and modern integration practices.

Key Responsibilities

As part of the Integration team, you will:

- Learn the fundamentals of enterprise data integration and ETL (Extract, Transform, Load) processes.
- Develop algorithms and programs to extract, validate, transform, and analyze business data.
- Assist in developing and supporting data integration pipelines between enterprise systems and the o9 platform.
- Participate in data profiling, cleansing, validation, and reconciliation activities to ensure data quality.
- Support the development of data transformation logic using SQL, Python, PySpark, Airflow, SSIS and ETL tools.
- Assist in configuring and monitoring batch and API-based data integration processes.

- Participate in unit testing, system testing, integration testing, and User Acceptance Testing (UAT).
 - Troubleshoot data and integration issues under the guidance of senior engineers.
 - Create and maintain technical documentation, including data mapping documents and support guides.
 - Collaborate with functional consultants, technical architects, and customer teams throughout project implementation.
 - Continuously learn new technologies, tools, and industry best practices related to Data Engineering and Supply Chain Planning.
-

Eligibility

- BE / B.Tech / ME / M.Tech / MCA graduates from Computer Science, Information Technology, Information Systems, Artificial Intelligence, Data Science, Electronics, or related disciplines.
 - Consistent academic performance with a passion for technology and problem-solving.
-

Desired Technical Skills

Candidates should have a good understanding of:

- SQL and Relational Database concepts
- Programming using Python, PySpark or Java
- Basic understanding of APIs, ETL concepts and Object-Oriented Programming (OOP)
- Knowledge of relational databases, dimensional modeling, star schemas, and data warehousing concepts.
- Basic knowledge of Cloud Computing Systems such as AWS, Azure, GCS etc.
- Exposure to Big Data technologies (Hive, Spark, Hadoop) is a plus but not mandatory
- Familiarity with the concepts of Lakehouse Architecture, Data Lake and Delta Lake

- Exposure to OpenAI, LLM-based integration patterns, or Retrieval-Augmented Generation (RAG) is a plus
-

Desired Competencies

We are looking for candidates who demonstrate:

- Strong analytical and logical thinking
 - Excellent problem-solving skills
 - Curiosity and willingness to learn new technologies
 - Good verbal and written communication skills
 - Teamwork and collaboration
 - Attention to detail and commitment to quality
 - Ownership and accountability
 - Ability to adapt quickly in a fast-paced environment
-

Learning & Career Growth

As an Application Engineer Trainee, you will undergo structured technical training and receive mentorship from experienced consultants. You will gain exposure to:

- Enterprise Data Integration
- SQL and Data Engineering
- Python and ETL Development
- Cloud Platforms (Azure, AWS, GCP)
- APIs and Enterprise Integration
- Supply Chain Planning
- AI-powered Digital Supply Chain Solutions
- The o9 Digital Brain platform

Successful trainees will have opportunities to grow into roles such as **Application Engineer, Senior Integration Consultant, Application Architect, and Technical Lead.**

What We Offer

- Comprehensive onboarding and structured technical training
- Opportunity to work on global enterprise projects
- Exposure to cutting-edge cloud, AI, and supply chain technologies
- Mentorship from experienced industry professionals
- Continuous learning and certification opportunities
- Collaborative and entrepreneurial work culture
- Competitive compensation and comprehensive benefits
- Excellent long-term career growth opportunities
