## About The Cloud Company

The Cloud Company is a modern software engineering company building powerful digital products, enterprise platforms, and AI-driven solutions for businesses. From intuitive web applications and scalable backend systems to intelligent AI-powered experiences, we bring together engineering expertise, thoughtful design, and emerging technologies to turn ambitious ideas into real-world solutions.

Our work goes beyond building software that looks good or works on launch day. We create reliable, scalable products that solve meaningful business problems and continue delivering value as businesses grow. We believe great software starts with curious minds, bold ideas, and people who genuinely care about what they build. We are looking for the next generation of developers to build it with us.

## Who We Are Looking For

We are looking for passionate students and fresh graduates who enjoy solving problems and turning ideas into working software. You do not need to know every framework. Strong fundamentals, hands-on projects, curiosity, and willingness to learn matter most.

## Full Stack Developer

- Project experience with a modern frontend framework such as **React, Next.js or TanStack Start**, using **TypeScript**.
- Mobile app development knowledge using **React Native**.
- Backend development knowledge using **FastAPI, Django, Hono or Node.js**, and building **REST APIs**.
- Working knowledge of databases such as **PostgreSQL, MS SQL Server and Redis**.
- Understanding of AI development using **LangChain, LangGraph, DeepEval, LLM APIs, and RAG with vector search**.
- Familiarity with **Docker, CI/CD pipelines, and AWS or Azure**.
- Familiarity with SQL queries, database fundamentals and Git.

We do not expect you to know everything. We expect you to be excited about learning, building, and getting better.

**For full details about the role, please refer to the attached JD.**
