

KAAR TECHNOLOGIES INTERVIEW EXPERIENCE

2021 – 2025

NAME: KANIGA B

ROLL NO: 7376211EI116

DEPARTMENT: EIE

ROUND 1 : ONLINE MCQ (3 Hours)

1. Analytical Ability
2. Numerical Ability (*Time & speed, Work & Efficiency*)
3. Verbal Ability
4. Psychometric Assessment
5. Pseudocodes
 - Find Output
 - Find which code gives correct output
6. Programming MCQ (*C/C++/Java/Python*)
 - From Oops & Other Basic concepts
7. One Program Question
(*Any Language can be used (C/C++/Java/Python)*
10-15 Test cases)

Question: Need For Speed

You are in a racing competition with no rules. A trophy is awarded to the first person to reach the final position. There are numerous routes that run through various cities. Nitro boosters, sand pits, crash sites and cops may be found on some routes. It takes one hour to travel from one city to another. Nitro boosters will double your speed for the next two routes. Sand will reduce your speed by half for the next two routes. Crash sites are routes where crashes occur frequently, and it takes one hour to safely drive out of a crash site. If you come across a cop on any route, you are automatically arrested and will not be able to proceed further. You are given a number of cities N , an array representing the special powers associated with each city, the total number of routes R and a 2D array of $R * 2$ representing the possible routes that could be taken to travel between the cities.

Your task is to find and return an integer array representing the path that can be taken to reach (N-1)th city in the minimum time. If there are no possible paths, return -1.

Note:

- The calculations on speed for each city will be done on the current speed and not the initial speed.
- Cities are named from 0 to N-1.

City 0 is always the starting city and City N-1 is always the destination.

Input: N = 5

city_powers = ["normal", "nitro", "sand", "crash", "normal"]

R = 6

routes = [[0, 1], [0, 2], [1, 3], [2, 3], [3, 4], [1, 4]]

Output: [0, 1, 4]

ROUND 2 : GROUP DISCUSSION (10-20 Mins)

1. Love Marriage and Arrange Marriage
2. Impact of Social Media on Youngsters

Note : Body Language, Eye contact, Words and language Fluency matters a lot

ROUND 3 : LEVEL 1 DISCUSSION (TECHNICAL HR (2:1))

1. Basic introduction and family background
2. What is SAP?
3. What is ERP?
4. Explain Business process management with example
5. What you know about KAAR?
6. Company's work, clients and product
7. Why EIE to IT?
8. My Aim and Vision in life
9. Strength
10. About my major achievements.
11. About my leadership activities.
12. How you developed yourself in programming
13. General questions from resume – projects, interest, skills
14. Basic Questions from programming language you choose
15. Code for sum of first 5 terms in Fibonacci series

ROUND 4 : LEVEL 2 DISCUSSION (PERSONAL HR (1:1))

1. Self-introduction
2. About Family
3. Plan for higher Studies?
4. Is there any problem in relocating or onsite for you and your family?
5. Why KAAR?
6. Company's clients, Global location
7. What Do you need from the company?
8. Where do u want to see yourself after 10 years?

Note : Be honest, bold & Know about the company's profile, SAP, ERP, BPM
