Job Description – Software Development Engineer

Company: Axentiz Technologies
Position: Software Development Engineer
Location: Bangalore

About the Role
Axentiz Technologies is looking for motivated and talented B.E./B.Tech graduates with a strong interest in software development. The selected candidates will undergo a 12-month internship with hands-on exposure to real-world software development projects, followed by an opportunity for full-time employment based on performance.

Eligibility Criteria
- B.E. / B.Tech only
- CSE, IT and related engineering disciplines preferred.
- ECE & EEE candidates with a strong interest and aptitude in software development are also eligible to apply.
- **Minimum CGPA: 7.0**
- **No current arrears.**
- Strong logical thinking and problem-solving skills.
- Good communication and willingness to learn new technologies.

Required Technical Skills
- Backend: Python (Core & Advanced), Django, FastAPI, REST API development and integration, backend application architecture.
- Database: MySQL, PostgreSQL, SQLite and MS SQL Server.
- Frontend: React JS, Advanced JavaScript, HTML/CSS and frontend-backend API integration.

Key Responsibilities
- Develop applications using Python, Django, FastAPI and React JS.
- Design and integrate REST APIs and databases.
- Build, test, debug and optimize software applications.
- Collaborate with the development team on project delivery.
- Implement solutions based on project requirements.

Internship & Compensation

- **Internship Duration:** 12 Months
- **Stipend:** ₹15,000 per month
- **Post-Internship CTC:** ₹4.0–4.5 LPA, based on performance
- **Service Bond:** 2 Years after successful conversion to full-time employment

Preferred Skills

- Hands-on experience through academic, personal or internship projects.
- Knowledge of Git/GitHub and version control.
- Understanding of software development lifecycle.
- Good debugging and problem-solving abilities.
- Ability to work independently and as part of a team.

Career Opportunity

Successful interns demonstrating strong technical performance, learning ability and professional conduct during the internship will be considered for full-time employment as a Software Development Engineer with Axentiz Technologies.

Build real-world software. Learn industry technologies. Grow with Axentiz Technologies.
