About SurveySparrow

At SurveySparrow, we're redefining how organizations listen, engage, and build meaningful relationships with their customers and employees.

We're a global SaaS (Software-as-a-Service) company that empowers businesses to collect feedback, automate workflows, and create exceptional customer and employee experiences. Thousands of organizations across the world from fast-growing startups to Fortune 500 enterprises trust our products to make data-driven decisions and deliver better experiences.

About the Role

As a **Solution Engineering Intern**, you'll be the bridge between our products, our customers, and our Sales team.

You'll work closely with experienced Solution Engineers and Account Executives (Sales) to understand customer challenges, showcase how our products solve real business problems, and help organizations make informed technology decisions.

This internship is ideal for students who enjoy technology, problem-solving, presentations, consulting, and customer interactions. We're looking for curiosity, communication skills, and a willingness to learn.

What You'll Do

- Learn the SurveySparrow product ecosystem, including SurveySparrow, ThriveSparrow, SparrowDesk, and SparrowCRM, and understand how each product solves unique business challenges.
- Understand customer business goals, uncover pain points, and gather requirements through discovery conversations.
- Assist in preparing and delivering compelling product demonstrations, presentations, and solution walkthroughs tailored to customer needs.
- Support technical discussions by helping customers understand product capabilities, integrations, and implementation approaches.
- Configure and customize demo environments to showcase relevant use cases and business scenarios.
- Research customer industries, business processes, market trends, and competitive landscapes to deliver contextualized solutions.
- Work closely with Sales, Product, Customer Success, and Engineering teams to design solutions that address customer requirements.
- Create and maintain presentations, demo scripts, solution documentation, battle cards, and other knowledge resources.

- Stay up to date with product releases, new features, industry trends, and competitor offerings.
- Help articulate SurveySparrow's value proposition by demonstrating how our solutions address customer challenges and differentiate us from competing platforms.

Who We're Looking For

We're looking for enthusiastic learners who enjoy solving problems and communicating ideas.

You might be a great fit if you:

- Are pursuing a Bachelor's degree(Engineering, Computer Science, IT, Information Systems, Electronics, Business Analytics, BCA, MCA, MBA, or related fields).
- Have excellent verbal and written communication skills.
- You enjoy presenting ideas and explaining concepts to others.
- Are curious about technology and how software solves business problems.
- Can think analytically and approach challenges with a problem-solving mindset.
- You enjoy puzzles, asking "why," and the feeling of seeing a solution come together.
- Work well in collaborative, cross-functional teams.
- Are eager to learn quickly and take ownership.
