

Yaswanth Raj E

| 7418340216 | yaswanthraje2004@gmail.com

EDUCATION

B.TECH AIML

Kongu Engineering College
2022 - 2026
CGPA: 8.10 (Till 6th Semester)

HSC

Vidyaa Vikas International School
2022
Percentage: 87

SSLC

Vidyaa Vikas International School
2020
Percentage: 88.4

COURSEWORK

GRADUATE

Data Structures
Data Analysis and Algorithms
Data Analysis
Database Management System
Big data Analytics

CERTIFICATIONS

Privacy and security in online social media
- NPTEL
Social network analysis - NPTEL

SKILLS

Languages:

• C • Python • Java • Javascript

Frontend :

• HTML • CSS • Javascript

Backend :

• MongoDB • Node.js

Frameworks :

• React.js • Express.js

Tools :

• PowerBI • Git • Github

Dev Tools :

• Vs Code • Jupyter Notebook
• Android Studio

AREAS OF INTEREST

- Full Stack Developer
- Machine Learning Engineer

EXPERIENCE

Position : ML Engineer
Feb 2024 - Apr 2024

AI MODEL CREATION AND DEPLOYMENT

CETILLION LABS | STUDENT INTERN

- Integrated Vertex AI, Bedrock, and Homebrewn models into a webpage during the internship, enhancing functionality with advanced AI-driven features.
- Developed and deployed a website for the company, enhancing its online presence and user engagement.

PROJECTS DONE

DEPARTMENT BUDGET TRACKER

- Developed a department budget tracker using React.js for the front-end and Node.js for the back-end, with the frontend hosted on Netlify and the backend on Render.
- Implemented budget allocation, transaction entry, and real-time balance updates to facilitate efficient financial tracking.

EVENT MANAGEMENT SYSTEM

- Implemented features to display approved events to students and generate detailed reports on student participation.
- Developed and integrated functionality to generate detailed reports on student participation

FOOD PRICE PREDICTION USING MACHINE LEARNING MODELS

- Developed a machine learning model to predict food prices using Decision Tree, Random Forest, XGBoost, Extra Trees, and Gradient Boosting algorithms.
- Evaluated model performance using R^2 scores to benchmark accuracy and optimize predictions.

PLANT DISEASE PREDICTION USING DEEP LEARNING

- Designed a deep learning model to accurately predict plant diseases by analyzing image data.
- Leveraged convolutional neural networks (CNN) for effective disease classification and detection.

ACHIEVEMENTS

First Prize

| CODING COMPETITION, KEC

Second Prize

| 30 HOURS HACKATHON, KEC
