PROFESSIONAL SUMMARY

Computer Science engineering student and Software Engineer Intern with experience building, debugging, testing, and optimizing production software applications. Proficient in Java, JavaScript, Spring Boot, REST APIs, SQL, Git, and Agile development with a strong foundation in Data Structures and Algorithms and Object-Oriented Programming. Experienced in software development lifecycle, defect resolution, code reviews, backend API development, and performance optimization.

EDUCATION

Kongu Engineering College, Erode

B.E. Computer Science and Engineering

2023 – 2027

CGPA: 7.88/10

Kongu Matric Hr. Sec. School, Namakkal

Higher Secondary (Computer Science)

2008 – 2023

83.1%

EXPERIENCE

Software Engineer Intern | IVTL Infoview Pvt. Ltd., Chennai

June 2025 – July 2025

- Collaborated with an Agile team of 8+ engineers to design, develop, test, and deliver production software modules, achieving 100% sprint delivery across assigned tasks.
- Diagnosed and resolved 15+ critical application defects across 3 core service modules, reducing application error rates by 40% and improving software reliability.
- Optimized 6 backend REST APIs by improving implementation efficiency and application performance, reducing average response time by 35% and increasing throughput by 20%.
- Participated in 20+ GitHub pull-request code reviews per sprint, enforcing coding standards and reducing post-merge defects by 25%.
- Contributed across the software development lifecycle including requirement analysis, development, debugging, QA testing, defect fixing, and production deployment for 4+ live features.

TECHNICAL SKILLS

Languages: Java, JavaScript, C, SQL

Core CS: Data Structures and Algorithms, Object-Oriented Programming, Operating Systems

Frontend: HTML, CSS, React, Next.js, Vue.js, Nuxt.js, Million.js, OpenTUI

Backend: Spring Boot, Express.js, NestJS

Databases: MySQL, PostgreSQL, MongoDB, Upstash

Tools: Git, GitHub, Dolt, DoltHub, Supabase, Appwrite, Neon, Floci

PROJECTS

Repofy | *React, Spring Boot, GitHub API, Upstash*

2026

- Built an AI-powered repository documentation tool using GitHub OAuth and GitHub APIs to extract structured content from 5+ file types across public and private repositories.
- Developed a Spring Boot backend with 10+ REST APIs for OAuth authentication, data transformation, repository processing, and third-party API orchestration.
- Implemented TanStack Query to reduce redundant API requests by 60% and improve client-perceived load time by 45%.
- Integrated Redis caching, reducing repeated query latency by 50% and supporting 200+ concurrent requests without measurable performance degradation.

Appfolio | *Next.js, MongoDB, REST APIs*

2025

- Architected a full-stack portfolio platform with JWT authentication and 8 RESTful API endpoints supporting user-specific project management.
- Designed a scalable MongoDB schema supporting 10+ project entries per user and implemented reusable application components for maintainable development.
- Integrated Million.js, achieving a 70% reduction in unnecessary component re-renders and a 20-point improvement in Lighthouse performance score.
- Built 15+ reusable responsive UI components, reducing code duplication by 40% and improving feature development efficiency by 30%.

Ambyto | *JavaScript, HTML, CSS*

2025

- Developed an emergency coordination platform supporting 3 user roles with real-time service request and dispatch workflows.
- Implemented accessible UI components across 10+ screens, achieving a Lighthouse accessibility score of 95+.
- Reduced initial page load time by 30% using lazy loading, asset compression, and DOM optimization for reliable performance on low-bandwidth devices.
