CAREER OBJECTIVE

Computer Science undergraduate with a strong foundation in software engineering (OOAD, data structures, algorithms) and hands-on experience shipping production systems end-to-end. Comfortable pairing with AI coding agents (GitHub Copilot, Cursor, ChatGPT, Claude) across the development lifecycle, from prompt-driven code generation to AI-assisted debugging, testing, and documentation, while applying clean-code principles, Git workflows, and systems-level thinking to keep AI-accelerated output production-ready.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), TypeScript, Java, C, SQL

AI-Native Development: Prompt Engineering, GitHub Copilot, Claude Code, AI-assisted code & test generation, AI-assisted IDE's, RAG, LLM API integration (OpenAI, Cohere, OpenRouter)

Backend & APIs: FastAPI, Flask, Node.js, Express.js, REST APIs, GraphQL, JWT, API-first documentation (Swagger/Postman), JUnit, Jest, NPM

Databases: MongoDB, PostgreSQL, MySQL, Pinecone (vector DB)

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Engineering Practices: Git/GitHub workflows, code review, CI/CD (GitHub Actions, Jenkins), unit & integration testing, exception handling

DevOps & Cloud: Docker, Jenkins, AWS EC2, Vercel, Render, VMware

EXPERIENCE

Generative AI Intern - *SystimaNX (Remote)*

Nov 2024-Apr 2025

- Designed, tested, and refined prompt strategies across multiple LLM providers for enterprise use cases, systematically evaluating outputs for accuracy, tone, and structure.
- Processed structured/unstructured datasets to raise data quality feeding downstream GenAI pipelines, translating business requirements into evaluation criteria.

Freelance Full-Stack Developer - *Independent - Sri Balaji Opticals, KEC, Twincord Academy & others*

2022 - Present

- Owned full software lifecycle (requirements, architecture, coding, testing, deployment) for live client projects, using Git branching workflows and iterative code review. Built a full-stack e-commerce platform (React, Node.js, MongoDB) with Razorpay payment gateway, webhook verification, structured exception handling, and role-based access; shipped with zero post-handoff critical bugs.

Product Intern - *OreOps Framework (P) Ltd - Erode, India*

Jul 2024- Oct 2024

- Authored technical documentation and user manuals using an API-first, specification-driven approach so feature behavior stayed testable and portable across teams.

PROJECTS

Happy Sisypheus | *Electron.js, Node.js, Frontier LLMs, NPM*

- Created & Maintaining "Happy Sisypheus", an open-source AI-assisted desktop frontend for the Bonsai CLI, adopted by 19+ development teams. Collaborated with the Bonsai core developers to review community contributions, automate AI-assisted development workflows, and continuously improve developer productivity and application reliability.

Indian Law RAG Pipeline | *Python, FastAPI, Pinecone, Sentence Transformers, OpenRouter*

- Built an end-to-end Retrieval-Augmented Generation system for Indian legal queries with vector embeddings and semantic search, achieving sub-2s first-response latency, with structured exception handling around API failures.

CSE Department Research Dashboard | *Python, OpenAlex API, GitHub Actions, Pandas*

- Built a Python ETL pipeline enriching publication metadata via the OpenAlex REST API, with GitHub Actions CRON automation and change-detection logic, serving 20+ faculty and 100+ publications.

Freelance-Desk | *React.js, TypeScript, Express, MongoDB, Tailwind CSS*

- Built a full-stack freelance CRM featuring Kanban task management, payment tracking, and client scheduling, reducing manual workflow overhead by ~60% through real-time state synchronization and a secure REST API backend.

Sri Balaji Opticals | *React.js, Vite, Node.js, Express, MongoDB, Razorpay*

- Engineered and deployed a production-ready e-commerce platform with secure Razorpay payment integration, virtual glasses try-on, and end-to-end ownership from system design to deployment.

EDUCATION

B.E. Computer Science & Engineering - Kongu Engineering College CGPA: 8.35 | 2023 – 2027 (Expected)

Higher Secondary - Sri Kumaran Matriculation Higher Secondary School 85.33%

CERTIFICATIONS & ACHIEVEMENTS

- Oracle Cloud Infrastructure 2025 – AI Foundations Associate | Full Stack Development with MERN – NASSCOM (ThingQbator) | Fortinet Certified Fundamentals in Cybersecurity | Google Analytics Certified (GA4)
- Smart India Hackathon – Internal Round Winner, KEC | IEEE Hackathon – Special Mention, VIT Chennai | RRC Paper Presentation – Winner, AI-powered BCI concept
