

MISTRAL Solution (Documentation...)

Note: Company Requirement is "Software Embedded Engineer"
Programming C language alone....

Round-1 (Aptitude and Technical MCQs)
Round-2 (Software Advanced Test)
Round-3 (Technical Interview)
Round-4 (HR)

Aptitude (Basics): -15min

- Train Problem's
- Age Problem's
- Ratio Problem's
- Number System
- Blood Relation's

Technical MCQs (Basics): 40min

- C - Snippet for predict the output
- Bit Manipulation questions
- fork concept in C
- Flow Chart question's

Software Advanced Test: 40min

C Snippet (nos 4)

Coding Question (nos 2) Note: [language :C, No Compiler]

1. Input: "We love Programming"

Output:

Short word: We

Long word: Programming

Description;

Find the short and long word in the given String in C.

2. Input:

Arr = {"ate","eat", "love"}

Anagram = "ate"

Output:

"ate" are anagram

"eat" are anagram

Description:

Find the anagram from the "Arr" list items... in C

Technical Interview: Note : [C only]

Bit Manipulation

macro in C

write the macro for reset the n th bit on the given number. (Reset
if 0 -> 0, if 1 -> 0)...

write the function for add the 8-bit number and return that
number..

Datatypes in C

Basics C concepts like (conditions)

predict the value :

a = 10

b = 11

c = 15

print(a > b < c)

OS questions:

Deadlocks

Starvations

Mutual Exclusion

Semaphores

General HR.....

Note : [C language oriented only]

MISTRAL Solution

Technical Interview 1:

- Basics Program in C
 - Reverse the string
 - Bit Manipulations..
- Advanced Concept in C
 - Preprocessor directives
 - Macros
 - File Inclusion
 - Conditional Inclusion
 - Data types
 - enum, typedef, struct, union...

Technical Interview 2:

- Project from Resume
 - They ask to implement the dynamic component in React...
- Git commands
 - To Push, Pull, Merge and etc....
- Implement the Linked List
 - Operation like
 - Insert at first,
 - Delete at first,
 - etc... .
- Linux Oriented Question
 - Commands usage, scenario based questions..
 - ls, find, cd, touch, tree, cat, tac
 - Write the command to find the Files/Directives which have name start with "X" and ends with "Y"....

Technical Interview 3:

(See Above...)

General HR..... .
