

MISTRAL SOLUTIONS PRIVATE LIMITED, BENGALURU

TOTAL NO. OF ROUNDS : 5

1. ONLINE ASSESSMENT
2. ONLINE CODING TEST
3. OFFLINE CODING ROUND
4. GENERAL HR DISCUSSION
- 5. GROUP DISCUSSION**

1.ONLINE ASSESSMENT

Section 1 – Aptitude

Questions : 10

Time Limit : 15 minutes

Topics:

- 1.Boats and Streams
- 2.Time and Work
- 3.Profit and Loss
- 4.Calendar
- 5.Time, Speed and Distance
- 6.Ages
- 7.Number Series
- 8.Coding and Decoding
- 9.Percentage
- 10.Number Property

Section 2 – Technical Questions

Questions : 16

Time Limit : 45 minutes

Contains Negative Marking for some questions

Topics:

- 1.Pointers
- 2.Recursion (Output Prediction)

3.Bit Swapping

4.Bitwise Operators such as XOR, AND and OR

- Programming Question :
 - i. Reverse a String using Recursion
 - ii. Remove Duplicates in the Linked List.
 - iii. Decimal to Binary and find position of 1, Right Rotate
- Majority of the Questions focused on the Output Prediction in C Programming
- Output Prediction from the Flowchart given.
- Output Prediction – Bitwise Operators, Binary and Hexadecimal, Pointers, Arrays
- A program was asked to write in Unix to divide processes.
- OS Mcq – 2

2. ONLINE CODING ROUND

Level 1 : Online Round (6 Questions)

Question involved in following topics.

- Output prediction based on (3 Questions):
 1. Flowcharts
 2. Code snippets
- Programs involving file operations, pointers, strings and arrays.
 1. Find the length of the string without using built-in functions.
 2. Reverse the number and print the sum of all its digits.
 3. Convert a Decimal number to binary and count the number of 1's and 0's in the binary representation.

3.OFFLINE CODING ROUND

Level 1: Pen and Paper Round

Question 1:

1. Validate whether the given string meets password criteria:

- At least one uppercase letter

- At least one lowercase letter
- At least one digit
- At least one special character
- No same character in adjacent
- Does not contain consecutive identical characters.

Output whether each condition is satisfied or not , if not print which conditions are failing.

Question 2:

Read a file and count the number of consecutive words containing 'e' and 'd' in it.

Level 2: Programming using compiler. (Compiler Round)

Question 1:

Write a C program to analyze a source tree (directory) . The analysis results shall include the below statistics about the source tree

- Number of Directories
- Number of Files
- File extensions and their count (eg : C , C++ , Java)
- Number of lines in each file
- Number of functions in each file

4.GENERAL HR DISCUSSION (20 minutes)

- Introduce yourself.
- Family Details.
- What is your native?
- What do you know about Mistral?
- Tell me Bad and good things about Mistral you heard.
- Do you have plans for higher studies?

- Preferred Work location.
- Work Location Details

5.GROUP DISCUSSION

Topic: In the event of a war between India and Pakistan, is using Indian Defense Technology an advantage, or should we rely on weapons from other countries?

In overall, they mainly focused on File handling in C, Bitwise operators, pointers, arrays, strings and directory traversals.

Preparation:

- Solved DC, DT, and problems in C in Skillrack.
- Referred File concepts, OS, DBMS in Geeks for geeks.
- Aptitude concepts in Indiabix , PrepInsta and some interview related technical question in InterviewBit.
- On LeetCode, solving problems by specific patterns to build coding skills.
