PLACEMENT DRIVE FEEDBACK

ROUND 1 : ONLINE APTITUDE AND TECHNICAL QUIZ (LEVEL -1)

S.No	Name	Feedback
1	ASHWIN A	I am Ashwin A. Today, I participated in the Mistral placement drive. The first round consisted of two sections: Aptitude (APS) and Software Basics. The APS section included 10 questions covering topics such as averages, calendars, time and distance, and combinations. The Software Basics section featured 13 questions focused on predicting the output of code snippets involving concepts like pointers and structs.
2	RAGHAVA MOORTHY	Today I attended Round 1 of Mistral drive, online. In round 1 we had aptitude section. This section consists of 10 questions for 15 minutes and as for the software section it consists of 13 questions for 40 minutes. I get shortlisted for round 2.
3	DIVYA SHREE	I'm Divya Shree S. Today, I attended Round 1 of the Mistral drive, which comprised two sections which is 10 aptitude questions within 15 minutes time duration and program snippets in 40mins. The aptitude questions covered topics such as Time and Work, Ages, and Profit and Loss. The coding snippets focused on Pointers, Arrays, and Recursions. After attending this drive, I realized the need to work on improving my skills in these areas.
4	ALBERT JEBASTIN	I am Albert Jebastin A. Today, I attended the Round 1 of the Mistral drive, which was conducted online. It consisted of two sections: the first one was aptitude, and the second one focused on software questions. In the aptitude section, there were 10 questions to be completed within 15 minutes, and most of the questions were easy

		for me. In the software section, there were 15 questions to be completed within 40 minutes. We had to predict the output for given code snippets and analyze flow charts. The questions covered topics like pointers and arrays. I made some mistakes in predicting the output for certain code snippets involving pointers. I realize that I need to practice more on these pointer concepts.
5	MUTHU BHARATHI M	I am Muthu Bharathi M. Today I have attended the Round 1 of mistral drive which was conducted in online at 10.30am. It consists of two sections first one is aptitude(10 Questions in 15 mins) in the concepts of Calendar,Time and Work,Number system).Second one is code snippets (13 Questions in 40 minutes) in the concepts of predict the output, pointers and array. I have done finished the round 1 and selected for round .
6	ARUN A	I'm Arun. Today I attended the placement drive Mistral Solutions in our campus. Round 1: Section 1 - 10 aptitude questions focused on Quants. Section 2 - 13 code snippet questions in C programming, mainly focused on pointers (arrays & strings), loops, and recursion. I performed well and got shortlisted for the second round.
7	CHARUTHI V	I'm Charuthi V Today, I participated in Round 1 of the Mistral Drive, which consisted of two sections. The first phase included 10 aptitude questions to be completed in 15 minutes, covering topics such as averages, profit and loss, trains, and number series. The second phase featured 15 code snippet questions to be completed in 40 minutes, focusing on arrays, pointers, strings, functions, recursion, and a few flowchart-based questions. Although I didn't advance to the next round, this experience has strengthened my resolve to enhance my skills and put in more effort.
8	AARTHI ABIRAMY A	I'm Aarthi Abiramy, today I attended the first round of the Mistral recruitment drive. This round was divided into two sections: the first focused on aptitude, and the second on software-related questions. In the aptitude section, there were 10 questions to be completed within 15 minutes, covering topics like time,

		speed, and distance, time and work, and averages. The software section had 15 questions, which needed to be completed within 40 minutes. These questions required us to predict the output of given code snippets and flowcharts, with a focus on pointers and arrays.
9	ANANTHA PUSHPA KALEESWARAN T	Today I attended the first and second round of mistral solutions placement drive. The first round consists of two sections. The first section is aptitude section and it consists of 10 questions and time limit is 15 minutes. The second section consists of 13 c programming questions and time limit is 40 minutes and I cleared the first round.
10	JEFFRY JOSHUVA AMALAN J	I am Jeffry Joshuva Amalan J , Today I have attended the Round 1 of mistral drive which was conducted in online. It consists of two sections first one is aptitude and second one is software questions. In the aptitude there 10 questions to be completed within 15 minutes and most of the questions are easy for me . And in the software question there are 15 questions which is to be completed within 40 minutes.we have to predict the output for the given code snippets and also for the flow chart the questions are from the topics of pointers and array. I made some mistakes in finding the output for some codesnippets from pointers. And have to practice more in this pointer concepts.
11	JOSHUA SAMUEL P	I am Joshua Samuel P. Today, I attended Round 1 of the Mistral drive, conducted online. The test had two sections: aptitude and software. The aptitude section had 10 questions to be completed in 15 minutes, and most were manageable. The software section had 13 questions with a focus on predicting code outputs and analyzing flowcharts, particularly on pointers and arrays. I made a few errors with pointer-related questions, so I plan to improve in that area.
12	KAUSALYA P	I am Kausalya P, Today I have attended mistral drive. Round 1 was conducted in the morning there were 10 aptitude questions from average, time and distance, age, blood relations, alphabet series and 13 C code snippets from pointers,array, matrix, string. I have shortlisted for second round it was conducted in the afternoon there were 6 questions to be completed in 45mins (2 program and 4 c code snippets and find the output from the flowchart).

		Program: Find the group of anagrams. Largest and smallest word in the string. I gave my best and waiting for positive results.
13	MANGAYARKARASI S	Myself Mangayarkarasi S, Today I have attended the Round 1 of mistral drive which was conducted in online at 10.30am. Round 1: No.of Sections: 2 1.Aptitude(10 Questions in 15 mins) in the concepts of Calendar,Time and Work, Alphabet Series,Number system) 2.Software questions(13 Questions in 40 minutes) in the concepts of (Predict the output, flow chart are in the topics of pointers,array and 3D array). I have done good in round 1 and selected for round 2.
14	MUTHU SNEKA R	I am Muthu Sneka R. Today I attended the a mistral drive. The first round was between 10:00 am and 11.45 am. There are 2 sections: 1.apititude - 10 questions Topics covered are profit and loss, logical reasoning, average, calendar and number system. 2. Code Snippets -13 questions Topics covered the basics of programming, loops, conditions, arrays, strings and pointers. Unfortunately, I couldn't make it to the next round. This made me realize where I'm lagging, and I will work towards it.
15	NARAYANAN M	I am Narayanan M. Today morning I have attended the mistral placement drive.The round 1 consists of two section- Aptitude and Software sections.The Aptitude sections consists of 10 questions which should be solve din 15 mins. The Software sections consists of 13 questions which should be completed in 40 mins.
16	NIVETHA T	I am Nivetha T, Today I have attended the Round 1 of mistral drive. It consists of two sections . Aptitude (10 ques) -15 mins Program snippets (15 ques) - 40 mins Aptitude topics are from number system, time and work, train ,averages, profit and loss and some logical questions. Second section questions topics are array, pointers, recursions ,looping conditions, strings, output prediction

		of flowchart. Unfortunately I'm not advanced to the next level. This made me to realize to work on still more.
17	RAMKUMAR P	I am Ramkumar P. Today I attended the mistral placement drive. In first round there are two sections aps and software basics. The topics covered in aps totally 10 questions average, calender, time and distance, combinations. In software basics 13 questions to predict the output like pointers, struct.
18	RATHI ASHA M	Myself Rathi Asha M. Today I attended the a mistral drive. The first round was between 10:00 am and 11.45 am. There are 2 sections first section aptitude - 10 questions Topics covered are profit and loss, logical reasoning, average, calendar and number system .second section Code Snippets -13 questions Topics covered the basics of programming, loops, conditions, arrays, strings and pointers. I couldn't make it to the next round. This made me realize where I'm lagging, and I will work towards it.
19	RUTHRA VARSHINI S	I am Ruthra Varshini S, Today Morning I attended the first round of mistral. In first round there are two sections aptitude and pseudocode. Aptitude containing 10 questions with a duration of 15 minutes and the questions are from combination, time and work, time speed and distance, ratio and proportion and the pseudocode containing 15 questions with a duration of 40 minutes. Questions are from the basics of c programming like array, string, predict the output.
20	SARANRAJ K	I am Saranraj K , Today I attended round 1 of mistral drive. It consists of two sections first one is aptitude and the second one is software based questions. In the aptitude there 10 questions to be completed within 15 minutes and topics covered calendar, time and word, time and distance. And in the software section there are 15 questions which are to be completed within 40 minutes. we have to predict the output for the given code snippets and also for the flow chart the questions are from the topics of pointers and array.
21	SELVAPRAKASH J	I am Selvaprakash J. Today, I attended a placement drive for Mistral. The first round took place between 10:00 am and 11:45 am. There were 2 sections:

		1. Aptitude - 10 Questions The topics covered included profit and loss, logical reasoning, averages, calendars, and number systems. 2. Code Snippets - 13 Questions The questions tested the basics of programming, loops, conditions, arrays, strings, and pointers. Unfortunately, I wasn't able to progress to the next round. This experience highlighted areas where I need improvement, and I am committed to working on them.
22	SMEGA	I am Smega. Today, I have attended the Mistral drive. The first round was held from 10:30 to 11.30AM and it consists of two sections: The first section is Aptitude which has 10 Questions and Topics included logical reasoning, averages, calendars, and number systems and the second sections is Code Snippets which has 13 Questions .The questions focused on the basics of programming, arrays, strings,and pointers I couldn't advance to the next round. This experience has highlighted the areas where I need improvement,and I will work towards it.
23	SRI SURYA GAYATRI	I am Sri Surya Gayatri. Today morning, I attended the first round of Mistral. The first round consisted of two sections: Aptitude and Pseudocode. The Aptitude section had 10 questions with a duration of 15 minutes, covering topics such as number series, time and work, time-speed-distance, trains,mixtures and coding decoding . The Pseudocode section included 15 questions with a duration of 40 minutes, focusing on the basics of C programming, such as arrays, strings, and predicting the output.
24	YOGA RAJ S	I am YOGARAJ S, today I attended the mistral drive morning The first round was conducted at 10:00 am , there are two sections one for aptitude containing 10 questions with 15 minutes, the second section contains 15 questions 40 minutes. Topics were covered like the basics of c programming, Loops , conditions, array, string, code snippet.
25	GIRIJA S	I am Girija S. Today, I took part in the first round of the Mistral drive. It had two sections: the first was aptitude, and the second focused on software-related questions. The aptitude section had 10 questions that needed to be completed in 15 minutes, covering topics like time and work, time and distance, trains, and ratio and proportion.

		The software section included 15 questions to be done in 40 minutes. These involved finding the output of code snippets and flowcharts, with topics focused on pointers and arrays. I did my best in this round.
26	SUMUGAR M	I am Sumugar M. Today, I attended Round 1 of the Mistral drive, which was conducted online. The round consisted of two sections: the first was aptitude, and the second was software-related questions. The aptitude section had 10 questions that needed to be completed within 15 minutes. It is from the concepts Time and work, Percentage, calendar, Time and Distance. The software section had 15 questions to be completed within 40 minutes, focusing on predicting the output of given code snippets and analyzing flowcharts. The questions mainly covered topics related to pointers and arrays. I did make some mistakes in predicting the output for a few pointer-related code snippets, so I need to practice more on pointer concepts.
27	KARISHMA S	I'm Karishma S. This morning, I participated in the first round of the Mistral recruitment process. The round was divided into two sections: aptitude and pseudocode. The aptitude section included 10 questions with a time limit of 15 minutes, covering topics such as time and work, time, speed and distance, ratio and proportion, and allegations and mixtures. The pseudocode section had 15 questions to be completed within 40 minutes, focusing on the basics of C programming, including arrays, strings, pointers, and output prediction. I couldn't make it to the next round but I've identified my areas of improvement which will be helpful for further drives.
28	SOUNDHARRAJAN J	I am Soundharrajan J. Today I attended the first and second rounds of the Mistral Solutions placement drive. The first round had two sections. The first section was aptitude with 10 questions, and we had 15 minutes to complete it. The second section had 13 C programming questions with a 40-minute time limit and I cleared the round 1.
29	RENUKA SRE V	Myself Renuka sre V, Today I attended round 1 of mistral solutions. It had two part pseudocode and aptitude. In aptitude we had 10 questions, we have to solve them in time period of 15 minutes. In pseudocode we had 15 questions to be work out in 40 minutes. Even though I

		didn't clear the first round, i was able to know my area of improvement and taken steps to improve it
30	SHREELAKSHMI C	I am Shreelakshmi C. Today, I participated in the Mistral drive, which commenced with the first round from 10:00 am to 11:45 am. The round had two sections: 1. Aptitude (10 questions): This section covered various topics, including Problems on Trains logical reasoning, Ages, ratio and proportion, and number system. 2. Code Snippets (13 questions): This section focused on the fundamentals of programming, including loops, conditions, arrays, strings, and pointers. Although I didn't progress to the next round, this experience helped me identify areas for improvement. I'm committed to working on my skills and knowledge to enhance my performance in future placement drive.
31	DHARMAR V M	I am Dharmar V. M. Today, I attended the Mistral placement drive in the morning. The first round began at 10:00 AM and consisted of two sections. The first section was an aptitude test with 10 questions to be completed in 15 minutes. The second section had 15 questions with a time limit of 40 minutes. Topics covered included C programming basics, loops, conditions, arrays, strings, and code snippets.

ROUND 2 : ONLINE APTITUDE TEST (LEVEL -2)

S.No	Name	Feedback
1	ASHWIN A	In Round 2, there were 6 questions: three programming questions and three output-prediction-based questions. The programming tasks included problems like finding anagrams and identifying the smallest and largest words in a given string. I gave my best effort and am now eagerly waiting for a positive outcome.
2	RAGHAVA MOORTHY	Today I attended Round 2 of Mistral drive, online. Second round consists of 6 questions, 2 programming 1. Anagram in array 2. Find the longest and shortest word in a string. and 4 code snippets and flowcharts.
3	MUTHU BHARATHI M	Round2 consists of 4 output prediction questions in the type of Flowchart and 2 programming.

		1 - Print the anagram of the given string and it's position in the array. 2 - Print the smallest and largest word in the given string. I have given my best in the round 2 and waiting for the positive results.
4	ARUN A	In round 2,2 code snippet questions, 2 flow chart questions and 2 programing questions. coding questions is, 1) Find the smallest and longest word in the line of input. Input : hai hello welcome Output: Smallest - hai Longest Round - welcome 2) Find Anagram match. Input: 3 [tea, ate, atm] tea Output: In 1st position tea In 2nd position ate I completed this round successfully and was shortlisted for the next round.
5	AARTHI ABIRAMY A	Round 2 consisted of 6 questions: 2 programming tasks and 4 output prediction questions. The programming tasks involved finding anagrams from a given list and identifying the smallest and largest words in a string. I did my best and am now waiting for the results.
6	ANANTHA PUSHPA KALEESWARAN T	The second round consists of 6 c programming questions. Out of 6, 2 of them are programs and other questions are output prediction. The coding questions are print the smallest and largest word in a sentence and print the anagram. I cleared the second round.
7	KAUSALYA P	In Round2,there were 6 questions to be completed in 45mins (2 program and 4 c code snippets and find the output from the flowchart). Program: Find the group of anagrams. Largest and smallest word in the string. I gave my best and waiting for positive results.
8	MANGAYARKARAS I S	In Round2 (6 Questions in 45 mins) It consists of 4 Output prediction questions(Flowchart)and 2 programming. 1.Print the anagram of the given string and it's position in the array.

		2.Print the smallest and largest word in the given string. I have given my best in the round 2 and waiting for the positive results.
9	RAMKUMAR P	In the second round there are 6 questions 2 coding questions (find anagram from array, find the small and longest word in sentence) remaining 4 has flowchart output prediction it consists of 45 mins.
10	SARAN RAJ K	In round 2 there are 6 question, three programming and three output prediction based questions. Programming questions like anagram, find smallest and largest word in give string.i did my best, waiting for good result.
11	YOGA RAJ S	In second round there asked 6 questions with 40 minutes 3 from programming and 3 code snippet and find the output based on the flow chart. I did my level of best and waiting for good results.
12	SOUNDHARRAJAN J	The second round had 6 C programming questions; 2 were coding questions, and the other 4 were about predicting outputs. The coding questions were about printing the smallest and largest words in a sentence and finding anagrams. I cleared the second round.

ROUND 3 – PHASE I : CODING

S.NO	NAME	FEEDBACK
1	Muthu Bharathi M	Today I have attended the mistral drive Round 3 Phase I.The programs are given and we have to write it in paper.If we solve one program ,then the other was given. Programs: 1.Print the count of 2 consecutive vowels in a string. 2.Reverse digits of a number. 3.Largest product of consecutive pair. I have only solved 2 questions among these but not selected for next phase.Through this, I came to know that I need to improve my problem solving skills. Thank you.

2	Arun A	I'm Arun. I attended the placement drive Mistral Solutions Round 3 in our campus. It has various coding questions to be solved in Paper and Pen. 1) Count of two consecutive vowels in a String Input : aexiouy output: 3 2) Reverse the digits in the number Input : 1234 Output: 4321 3) Convert decimal to hexadecimal, reverse hexadecimal, convert to decimal. Input : 1234 Output: 724 (4D2 -> 2D4 -> 724) 4) Count of word which has 'e' and 'd' in the file. Input : Feed hide ride raid Output: 3 5) Largest product of two consecutive pairs. Input : {6, -3, -10, 0, 1} Output: {-3, -10} 6) Largest product of consecutive subarray. Input : {6, -3, -10, 0, 1} Output: {-6, 3, -10} I had solved all problems successfully and got to the next stage.
3	Aarthi Abiramy A	I am Aarthi Abiramy A. Today, I have attended in Round 3 of the Mistral Drive. Round 3, Phase 1: Each question was presented to us one at a time, and we were required to explain our solutions after completing each one. The start time for each question was recorded. The programs were: 1. Count consecutive vowels. 2. Reverse a number.

		3. Convert a given integer (decimal) to hexadecimal and then reverse it. I successfully solved these three questions, but unfortunately, I didn't make it to the next phase. I came to know where I need to improve, and I am determined to strengthen my technical skills .
4	Anantha Pushpa Kaleeswaran T	Today I attended the placement drive of mistral solutions. The third round consists of two section. The first section consists of four questions - count the two consecutive vowels, reverse the number, count a word from the file if it contains d and e on a word and largest product of two consecutive pair in an array. Also they asked to modify the two questions. They asked to modify the question reverse the integer to reverse the hexadecimal number. Also they asked to modify the question largest product of two consecutive pair in an array to find the largest product of an subarray in an array. I cleared that round and goes to the second section.
5	Mangayarkarasi S	I am Mangayarkarasi S,Today I have attended the mistral drive Round 3. Round 3 Phase 1: I asked to write 5 questions. Programs: 1.Largest product of consecutive pairs 2.Products of All consecutive pairs print them in descending order. 3.Print the count of 2 consecutive vowels in a string 4.Print the count of number of words that contains both the characters 'e' and 'd' in the text file. 5.Reverse the digits of a number and print them in a hex decimal form. I have solved all the 5 questions and selected for phase 2.
6	Saranraj K	I am Saranraj K. Today, I attended the Mistral drive 3rd round, which was a written test. In phase I, they asked 4 questions. The first question was to print the count of 2 consecutive vowels. The second question was to reverse the number, then convert the output to hexadecimal and again convert it to decimal. The third question was to read input from a file, then find the count of words that contain the letters 'd' and 'e'. In the third question, I explained my

		logic, but the interviewer was not satisfied with it, so I got rejected.
7	Yogaraj S	I am YOGARAJ S, today I have attended the mistral drive 3rd round it's a written test in phase I asked 4 questions and also they asked me to optimise it the program. And selected for phase 2.
8	Soundharrajan J	First section consists of 4 questions and they asked to modify 2 questions. The questions are Count the pair of vowels, Reverse the number, Count the word containing both d and e in a file and Print the pair of largest product elements. The modified programs are Reverse the hexadecimal number and produce the output in hexadecimal format and Print the largest product subarray.

ROUND 3 – PHASE II : CODING

S.NO	NAME	FEEDBACK
1	Arun A	This stage has 1 question. Print the top 10 most frequent words in the file in descending order. This seems challenging task for me and I solved in normal loops. But it is expected to implement using structure. So that I got eliminated in this round.
2	Anantha Pushpa Kaleeswaran T	The second section contains only one question. Print the top 10 most repeated words in a file Input : File.txt : “The cat chased the mouse around the house. The cat was quick, but the mouse was quicker. The cat tried to catch the mouse, but the mouse darted through a small hole in the wall. The cat sat by the hole, waiting for the mouse to come out. The mouse, however, was too smart for the cat, and the cat eventually gave up, wandering away from the hole.” Output : the cat mouse hole was tried quick too but chased
3	Mangayarkarasi S	It is also a written test. Only one question is given. 1. Print the top 10 most repeated words with their count in descending order of a particular text file.

		I have explained my logic in the last time but it doesn't meet out their expectation. I want to improve myself in a concepts of files handling.
4	Yogaraj S	In this round they give a program using file concept I give my solution but which does not meet out their expectation so, I got rejected . I want to improve myself in a better way.
5	Soundharrajan J	The Second section consist of only one question. The question is Print the top 10 most repeated words in a file. Input : File.txt : —The cat chased the mouse around the house. The cat was quick, but the mouse was quicker. The cat tried to catch the mouse, but the mouse darted through a small hole in the wall. The cat sat by the hole, waiting for the mouse to come out. The mouse, however, was too smart for the cat, and the cat eventually gave up, wandering away from the hole.¶ Output : the cat mouse hole was tried quick too but chased

ROUND 3 – PHASE III : CODING

S.NO	NAME	FEEDBACK
1	Anantha Pushpa Kaleeswaran T	The third section contains only one question. Read the file and increment the number by one and ignore the alpha numeric words. Input : File.txt : "OpenAI 123 GPT-4 model123 AI2024 is amazing!" Output : File.txt : “OpenAI 123 GPT-4 model 124 AI2024 is amazing!”
2	Soundharrajan J	The third section consist of only one question. The question is Read the file and increment the number by one and ignore the alpha numeric words. Input : File.txt : "OpenAI 123 GPT-4 model123 AI2024 is amazing!" Output : File.txt : “OpenAI 123 GPT-4 model 124 AI2024 is amazing!”

ROUND 4 – TECHNICAL INTERVIEW 1

S.NO	NAME	FEEDBACK
1	Anantha Pushpa Kaleeswaran T	The technical questions asked in this round are I. Which framework are you familiar? II. Are you adoptable to backend? III. Tell about your project. IV. Show your project result screenshots V. Whether you used database in your project? VI. What is the database you used? VII. If the system crash whether the data will delete or not delete in your project? VIII. Whether you'll change your project into backend? IX. How the server page calls? X. What is ajax? XI. What is the purpose of ajax? XII. Whether you work in ajax? XIII. How the browser loads the webpages? XIV. What is http? XV. What is tcp/ip? XVI. What is the difference between http and tcp/ip? XVII. What are the layers in osi model? - XVIII. In which layer http works? XIX. What is physical layer? XX. What is the physical layer in your phone? XXI. Whether you will work only in web development or other domain also? XXII. How will you switch to various domains? - XXIII. Do you have any questions?
2	Soundharrajan J	The technical questions asked in this interview are I. Tell about yourself II. You said you are familiar with Java. What topics are you familiar with in OOP? III. Explain inheritance in Java. IV. Why do we use an interface? V. What is the difference between an abstract class and an interface? VI. Do you know about multithreading? VII. How can you run JavaScript? VIII. Why do you like Flutter? IX. In Flutter, where do we apply OOP concepts? Explain with a real-time example.

ROUND 4 – TECHNICAL INTERVIEW 2

S.NO	NAME	FEEDBACK
1	Anantha Pushpa Kaleeswaran T	The technical questions asked in this round are I. Tell about yourself II. What is bootstrap css? III. Tell about family IV. Why react js? V. What is short term goal and long term goal?
2	Soundharrajan J	The technical questions asked in this round are I. Can you explain your project? II. How many members are there in your team? III. What is your role in the project—are you a team member or a leader? IV. Why should you be chosen as a leader? V. Which module did you work on in the project? VI. How can you make a Flutter project compatible with all kinds of applications (small and large screens)? VII. Have you checked if it also works on iOS?

ROUND 5 – GENERAL HR

S.NO	NAME	FEEDBACK
1	Anantha Pushpa Kaleeswaran T	The questions asked in this round are I. How are you? II. What is leaflet js? III. Where are you basically from? IV. Tell about family.
2	Soundharrajan J	The questions asked in HR interview are I. How are you? II. Where are you basically from? III. Explain your project briefly in less than 2 minutes. IV. Do you have any questions? V. Do you have any interest in higher studies?
