FEEDBACK

ROUND 1- CODING

This round was conducted through online at wingspan portal . It has one question from easy, medium and hard , of total 3 questions with duration of 3 hours. It is based on DSA Concepts.

Q 1) Maximum Yield – It is a dynamic programming question

Q 2) Maximum Weight of K Non-Overlapping Intervals – It is a dynamic programming and binary search and sorting question

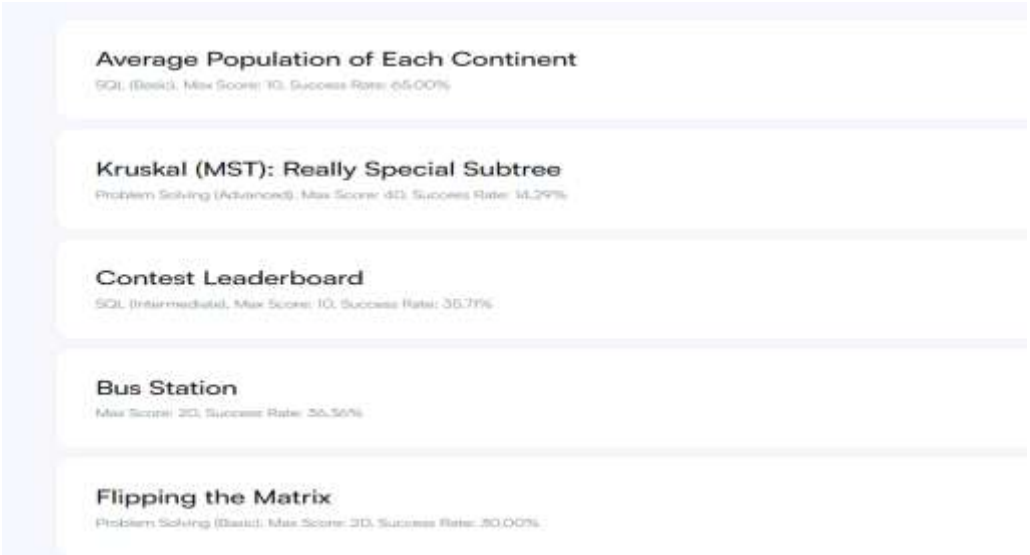

Q 3) Kolakoski Tree Problem- It is a Tree Dynamic Programming + Graphs (Tree DFS) + Mathematical Sequences

ROUND 2- CODING

It is conducted through offline mode at Karpagam College of Engineering , Coimbatore . It has total of 4 questions each from easy, medium, hard and complex duration of 3 hours. It has also conducted through wingspan portal. Need to solve atleast 2 question to progress to next round . Based on this round, the role will be assigned for the next round.

ROUND 3- CODING & TECHNICAL INTERVIEW

It is conducted through offline mode at Karpagam College of Engineering , Coimbatore . There were pre-placement talk then test in hackerrank platform .It has 2 sets of questions each set has 5 questions of total : 2 SQL and 3 coding with a time of 1.5 hours.

After this we were taken to technical interview , in which I were asked to solve the array related question in pen and paper . After which I have asked questions from my resume starting from general knowledge at concepts of AI,ML,DL,RAG Model and he questioned me from each skills I have mentioned in my resume . At last he gave me a table and scenario to write sql query for it using subquery as well as join . Overall , It has lasted approximately 1 hour.
