JOB DESCRIPTION — CYBER SECURITY FRESHER

NavaNala Technologies | Entry-Level / Junior Cyber Security Analyst

Experience: Fresher **Employment:** Full-time **Focus:** Security Operations & Practical Learning

ROLE OVERVIEW

NavaNala Technologies is seeking a motivated Cyber Security Fresher to support security monitoring, basic network and endpoint protection, troubleshooting, incident documentation, and hands-on cybersecurity projects under senior-team guidance.

KEY RESPONSIBILITIES

- Monitor basic security alerts and logs; identify suspicious activity and escalate potential incidents.
- Assist with firewall rules, antivirus/endpoint protection, Wi-Fi/hotspot security, updates, and routine security checks.
- Help with initial incident triage, evidence collection, ticket updates, and clear technical documentation.
- Participate in approved security testing, troubleshooting, user awareness, and project/lab work.

REQUIRED KNOWLEDGE

- **Networking:** IP addressing, LAN/WAN, OSI and TCP/IP models, DNS, DHCP, NAT, routing, switching, VPN, and Wi-Fi basics.
- **Ports & protocols:** HTTP/HTTPS 80/443, DNS 53, SSH 22, FTP 21, SMTP 25, DHCP 67/68, RDP 3389; TCP vs UDP.
- **Security basics:** firewall allow/deny rules, antivirus real-time protection and quarantine, WPA2/WPA3, MFA, least privilege, patching, encryption and backups.
- **Threats:** phishing, social engineering, malware, ransomware, brute-force attacks, credential theft, spoofing, scanning, suspicious logins and traffic.

PRACTICAL SKILLS & PROJECT WORK

- Use beginner tools/commands such as ping, ipconfig/ifconfig, tracert/traceroute, nslookup/dig, netstat/ss, and Wireshark.
- Apply structured problem-solving: define the issue, collect evidence, test causes, verify fixes, document results, and escalate when needed.
- Complete or contribute to practical projects: configure test firewall rules; review antivirus alerts; analyze sample logs/packet captures; assess phishing or hotspot risks; prepare screenshots and a short report.

QUALIFICATIONS & PERSONAL ATTRIBUTES

- Graduate/diploma student or recent graduate in Cyber Security, Computer Science, IT, or a related field; certifications and lab experience are a plus, not mandatory.
- Curious, analytical, detail-oriented, willing to learn, able to communicate clearly, protect confidential information, and perform all testing only in authorized environments.

How success is measured: Safe troubleshooting, accurate documentation, timely escalation, learning progress, and completion of assigned practical tasks.
