

SURVEY SPARROW

GAUTHAM S (7376222IT137)

INTERVIEW EXPERIENCE

ROLE : FRONTEND DEVELOPER

TOTAL ROUNDS :

1. Application Development
2. Written test
3. HR round 1
4. HR round 2
5. HR round 3 (with CTO)

Initial Filtering -- APPLICATION DEVELOPMENT (120 people registered)

- They had given a calendar App requirements and asked us to develop that application in two days. We need to complete the application then push your code to github and provide them the hosted url of your application.
- Requirements Given on App:
 1. The calendar should display the current month and year by default, with a grid layout showing all the dates.
 2. Users need the ability to navigate to previous and next months using designated buttons.
 3. For better user experience, the current date should be visually highlighted within the calendar grid.
 4. The calendar should display events loaded from a provided static JSON file. Each event should include details like title, date, time, and duration.
 5. Events should be visually represented on the corresponding dates within the calendar grid.
 6. The calendar interface needs to handle potential conflicts when multiple events are scheduled on the same date and time. This could involve color-coding overlapping events or displaying a notification.
- I will give my Hosted App. Make use for reference : <https://gauthamsrini.github.io/CalendarFrontend/>

TIPS : you can use ai to develop the application but the thing is you must know what all the things that the AI had done in your App. You can able to edit and change the functionality in HR Rounds so **beware of your code**.

ROUND 1 – WRITTEN TEST (80 People shortlisted from 120)

Pattern: (100 marks , Negative Marks for wrong Answer)

- 20 Mcqs (each carry 2 marks , total 40 marks)
- 10 programming / Dev (each carry 6 marks , total 60 marks)

Syllabus :

- For Mcqs -- HTML, CSS, Javascript, React
- For programming / dev -- Basic programming questions (Strings, Arrays), React Map function, Javascript DOM Manipulation, Array method in Javascript.

TIPS (Round 1) : Be careful on your answers as there is negative mark. Try to answer most questions, read top interview mcqs in GFG and Interview Bit that will be more helpful.

ROUND 2 – HR Interview (12 People shortlisted from 80) (45 Mins)

- Self Introduction
- Explain About Your project what you have mentioned in self intro
- He gave a ui card and asked me to replicate the design within 30 minutes. you can use React or Plain HTML CSS

TIPS (Round 2) : They just evaluate your capability, concentrate on layout first, try to develop the layout of the card first then concentrate on colours and fonts, use color picker extension to pick the exact colour if needed.

ROUND 3 – HR Interview (1 ½ hrs) (5 people shortlisted from 12)

- Self Introduction
- Mostly general hypothetical questions which could trigger your creativity (Behavioural Questions).
- Given a Dummy API (<https://api.escuelajs.co/api/v1/products>) and asked to fetch the data in that api using react. Display the fetched data in a grid

layout (only title and image). Then implement the search functionality on this grid by using title.

- How could you solve an error faced in frontend.
- Project explanation. One project in deep about the tech stack and the workflow and the core problem statement addressed...
- Dom manipulation in JS
- He asked the aproch what you have taken to implement the calendar ui app
- Asked how would you do the same api fetching task with plain HTML and js just explain the flow (to check the understanding of DOM manipulation in JS)
- What other technologies do you eager to learn
- What the thing that made you so excited in past 6 months (technology)
- Knowledge of the react component liberies(Mui , ant design)
- If you have a task to design a component library on your own what components you prefer to add to it.
- How many years you are using the react.
- What is the expectation of your workplace

TIPS (Round 3) : make a note that when your are doing the task hr will monitor you completely, he will not allow use to use any auto fill extension in VS code. Each and every line should be typed by yourself so you must be practised to do it in a better manner.

ROUND 4 – HR Interview (With CTO)

- Self Introduction
- Project Explanation
- Then he gave me a web page (About page of CRED) and asked me to develop the page within 10 minutes, you can use AI.
- Why do u choose this field
- What's your expectations on your work place
- What Makes you Fall in interest in Frontend Development and how you see yourself in next five years.

TIPS (Round 4) : the fact is if you type the code line by line in this round then definitely you cannot able to complete it within 10 minutes. The motive of this round is to test how efficiently you use AI to develop your Application, your prompt analysis so use the AI in a effective manner and try to replicate the page.

OVERALL TIPS :

The interview will flow up according to the panel members alone. This interview experience is only for frontend role in survey sparrow and also the questions may differ according to the panel member some may ask Java questions also, be prepared on that. For All HR rounds the main thing is that you need to prove your capability in development that's more than enough. Experience in web development matters a lot. Practice development prior the interview. Prepare the top interview questions and MCQs in GFG and Interview Bit that's way good enough in many situations. Basics important.

All the Best...Do Well
