Radiant Global Technologies Interview Experience

Round 1 : MCQ TEST

The 1st round was an MCQ test with 3 sections.

The 1st section was based on Supply Chain Problems.

The 2nd section consisted of Aptitude and Logical Reasoning questions.

The 3rd section consisted of SQL and Output Prediction questions.

The round mainly tested problem-solving, logical thinking, SQL knowledge, and the ability to predict program outputs.

Round 2: Technical Interview

The 2nd round was a Technical Interview. It mainly focused on SQL and the basics of Python. The interviewer asked practical SQL questions and followed up with questions to check my understanding of joins, ranking, relationships between tables, and basic programming concepts.

1. There were 1000 products in Company A and 980 products in Company B. I was asked how to find the missing products. I said that I would use a LEFT JOIN and check for NULL values.

2. I was asked to explain SQL JOINs with examples.

3. They asked about DENSE_RANKING and how it is used in SQL.

4. They asked about SELF JOIN, including how to find the manager for each employee.

5. They asked how to swap two variables without using a temporary variable.

6. Different ways of creating a table

7. How to copy one table from another table (only the schema not the data

8. how I used data analysis in my projects

Round 3: HR Round

The 3rd round was the HR round. It was mainly focused on general and personal questions. They asked about my preferred location, family, hobbies, and other general questions. The round was conversational and focused on getting to know me beyond the technical interview.
