

BEFHUE PVT LTD

Software Developer Intern

3 Openings · Full-time Internship · Coimbatore (Work from office or Hybrid)

ABOUT BEFHUE PVT LTD

Befhue Pvt Ltd is a product-focused technology company building Zenxify, a web-based AI platform currently in active development. We're a small, early-stage team, and every intern here works directly on features that ship, not busywork. Full product details are shared with candidates during the interview process.

ABOUT THE ROLE

We're hiring 3 developer interns to work directly with our founding engineers on our core web product. You'll be assigned to whichever area fits your strengths best after an initial conversation — frontend, backend, or API/third-party integration.

WHAT YOU'LL WORK ON

- Building and improving parts of our web application's user interface (React).
- Developing and hardening backend services and internal tools.
- Integrating third-party APIs into our product workflow.
- Writing and maintaining backend services that power core product features.
- Real bug-fixing and QA on a product that real pilot users will be using during your internship.

WHAT WE'RE LOOKING FOR

- Currently pursuing a degree in Computer Science, IT, or a related field (final-year or pre-final-year preferred).
- Solid fundamentals in at least one of: JavaScript/TypeScript, Python, or Node.js.
- Comfortable with Git and reading/writing code in an existing codebase, not just personal projects.
- Genuine curiosity about AI tools and APIs — you don't need prior ML experience, but you should be excited to learn.
- Able to commit to the full internship duration and work independently with regular check-ins.

NICE TO HAVE (NOT REQUIRED)

- Experience with React, Next.js, or a modern frontend framework.
- Any prior exposure to calling LLM or generative-AI APIs (OpenAI, Gemini, etc.).
- A GitHub profile, personal project, or hackathon build you can walk us through.

WHAT YOU'LL GAIN

- Direct mentorship from the founding engineering team — no busywork, real product ownership.
- Hands-on experience with production AI/ML APIs, not just tutorials.
- A certificate of internship, and a strong recommendation for interns who perform well.

- A shot at a full-time offer at the end of the internship, based on performance.

KEY DETAILS

Openings	3 Developer Interns
Duration	6 months (flexible for academic schedules)
Location	Coimbatore, Tamil Nadu — <i>Work from office or Hybrid</i>
Stipend	Paid internship — details shared during the interview
Start Date	Rolling — flexible based on candidate availability

HOW TO APPLY

Interested students can apply by sending their resume and (optionally) a GitHub link or project you're proud of to guruprasath@befhue.com with the subject line “Developer Intern — [Your Name]”. Shortlisted candidates will be invited for a short technical conversation.

For college placement cells: we're happy to visit campus or run a virtual info session for interested students. Reach out to the same email to coordinate.
