ENGLISH WRITING (1 question)

Q1 Subjective Hard 10 pts

Topic:

Ethical Concerns Surrounding Data Collection by Tech Companies

Write an article in 150–180 words discussing the risks, responsibilities, and long-term implications of large-scale data collection by corporations.

Min: 150 words Max: 180 words

ENGLISH GRAMMAR (5 questions)

Q2 MCQ Hard 1 pt

Which of the phrases given below each sentence should replace the phrase printed in bold type to make the grammatically correct? He hesitated to listen to what his brother was saying.

A. listened to hesitate

B. hesitated listen to

C. hesitates to listening

D. No correction required ✓

EXPLANATION

Sentence:

He hesitated to listen to what his brother was saying.

The sentence is already correct.

All other options create incorrect grammar structures.

Correct Answer: Option 4 (No correction required)

Q3 MCQ Hard 1 pt

Among the options given, choose the one that is grammatically correct for the bold part:
There is no more room for you in this compartment.

A. there is no more seat

B. there is no more space

C. there is no more accommodation

D. No error ✓

EXPLANATION
Sentence:
There is no more room for you in this compartment.
The sentence is already grammatically correct.
All other options change the meaning or sound unnatural.

Q4 MCQ Hard 1 pt

Fill in the blank(s) with the most suitable option. There_____four excellent restaurants in the center of town.

A. was

B. are ✓

C. being

D. is

EXPLANATION
Sentence:
There _____ four excellent restaurants in the center of town.
Subject = four restaurants (plural)
So the verb must also be plural → are.

Q5 MCQ Hard 1 pt

Find out which part of the sentence below has an error and mark the option accordingly. I am well / I would / prefer coffee / to cool drinks.

A. prefer coffee

B. to cool drinks. ✓

C. I would

D. I am well

EXPLANATION
Sentence:
I am well / I would / prefer coffee / to cool drinks.
The phrase “to cool drinks” means the drinks must be “cool” temperature-wise, which is wrong.
The correct phrase is “to cold drinks.”
So, ‘to cool drinks’ is incorrect → Option 2.

Q6 MCQ Hard 1 pt

Choose the phrase that should replace the part printed in bold to make the sentence grammatically correct:
Being worked for a whole day, you should have taken some rest.

A. after having work

B. Having worked for ✓

C. working for

D. after being worked for

EXPLANATION
"Being worked for" is an incorrect passive. The perfect participle "Having worked for a whole day" shows an action completed before the rest that should have been taken.

NUMERICAL PUZZLE (4 questions)

Q7 MCQ Hard 1 pt

Find the next number in the sequence:
1, 2, 6, 24, 120, _____?

A. 240

B. 720 ✓

C. 600

D. 360

EXPLANATION
This is the factorial sequence: 1! = 1, 2! = 2, 3! = 6, 4! = 24, 5! = 120, 6! = 720.
Each term is multiplied by the next integer: 1×2=2, 2×3=6, 6×4=24, 24×5=120, 120×6=720.

Q8 MCQ Hard 1 pt

If
X + X + X =33;
X + Y + Y = 31
then X + Y = ?

A. 21 ✓

B. 18

C. 16

D. 12

EXPLANATION
3X = 33 ⟶ X = 11.
Then 11 + 2Y = 31 ⟶ 2Y = 20 ⟶ Y = 10.
So X + Y = 11 + 10 = 21.

Q9 MCQ Hard 1 pt

A number when divided by 3 leaves remainder 1. When the same number is divided by 4, it leaves remainder 2. What is the smallest such number greater than 10?

A. 22 ✓

B. 10

C. 34

D. 46

EXPLANATION
Number ≡ 1 (mod 3) and Number ≡ 2 (mod 4).
Numbers ≡ 1 (mod 3): 1, 4, 7, 10, 13, 16, 19, 22, 25...
Numbers ≡ 2 (mod 4): 2, 6, 10, 14, 18, 22, 26...
Common numbers: 10, 22, 34...
Smallest greater than 10 = 22.

Q10 MCQ Hard 1 pt

Find the next number in the series: 2, 5, 12, 27, 58, ?

A. 111

B. 115

C. 121 ✓

D. 127

EXPLANATION
Differences are 3, 7, 15, 31 (each is 2^n - 1, i.e. each difference = 2 x previous + 1). Next difference = 63, so 58 + 63 = 121.

PSEUDO CODE (5 questions)

Q11 MCQ Hard 1 pt

What will be the output of the following pseudocode?

```
Integer a=5, b=8, c
if (a>8 OR b9)
   c=a-b
else
   a=a+5
   c=c-2
end if
a=a+b
Print a and c
b=b-5
```

A. None of the mentioned

B. 5 -3

C. 5 1

D. 13 -3 ✓

EXPLANATION

a>8 is false and b<7 is false, so the first branch is skipped. a+b = 13 > 9, so the elseif branch runs: c = 5 - 8 = -3. Then a = a + b = 5 + 8 = 13. Output: 13 -3.

Q12 MCQ Hard 1 pt

What will be the output of the following pseudocode?

```
Integer a, n, sum, q, r
Set a=123, n=0, sum=0
Set q=a
while (q mod 10 NOT EQUALS 0)
   n=n+1
   q=q/10
End while
Print n
while (a greater than 0)
   r=a mod 10
   sum=sum + r
   a=a/power(10, n-1)
End while
Print sum
```

A. 3 2

B. 6 4

C. 6 5

D. 3 4 ✓

EXPLANATION

First loop (integer division): q = 123, 12, 1 → 3 passes, then q = 0 stops it, so n = 3 (prints 3). Second loop divides a by 10^(n-1) = 100 each pass: a = 123 → r = 3, sum = 3, a = 1; a = 1 → r = 1, sum = 4, a = 0. So sum = 4 (prints 4). Output: 3 4.

Q13 MCQ Hard 1 pt

What will be the output of the following pseudocode for a = 2, b = 3?

```
doSomething(Integer a, Integer b)
   if (b == 1)
      return 0
   else
      return a + doSomething(a, b - 1)
End function doSomething
```

A. 3

B. 4 ✓

C. 2

D. 1

EXPLANATION
Recursion adds 'a' until b becomes 1.

Q14 MCQ Hard 1 pt

What will be the output of the following pseudocode?

```
Integer x, y, Z, a
Set x=2,y=1,z=5
a = (x AND y) OR (z + 1)
Print a
```

A. 5

B. 3

C. 2

D. 1 ✓

EXPLANATION
(z+1) becomes a true value → Boolean OR gives 1.

Q15 MCQ Hard 1 pt

What will be the output of the following pseudocode for p = 3 and q = 4?

```
int fun1(int p, int q)
   if (q EQUALS 0)
      return 0
   if (q mod 2 EQUALS 0)
      return fun1(p + p, q/2)
   return fun1(p + p, q/2) + p
End function fun1()
```

A. None of the options

B. 7

C. 12 ✓

D. 8

EXPLANATION
fun1(3,4) → fun1(6,2) → fun1(12,1). For q = 1 (odd): fun1(24,0) + 12 = 0 + 12 = 12. The function effectively computes p x q = 3 × 4 = 12.

VERBAL ABILITY (20 questions)

Q16 MCQ Hard 1 pt

Choose the correct sentence:

A. He could hardly understand what she was talking about. ✓

B. He could hardly understood what she was talking about.

C. He could hardly understand what she was talked about.

D. He could hardly understanding what she was talking about.

EXPLANATION
"Could" always takes the base form of the verb → "could understand" is correct.

Q17 MCQ Hard 1 pt

Select the correct form of the verb to complete the sentence:
She ____ a great time at the party yesterday.

A. had ✓

B. have

C. has

D. will have

EXPLANATION
"Yesterday" → simple past → had.

Q18 MCQ Hard 1 pt

Which sentence is correct in terms of subject-verb agreement?

A. The group of students are waiting for the bus.

B. The group of students is waiting for the bus. ✓

C. The groups of students is waiting for the bus.

D. The groups of students was waiting for the bus.

EXPLANATION
"Group" is a singular collective noun and takes a singular verb → "is" (option2 is correct). Option1 wrongly pairs singular "group" with plural "are". Option3 wrongly pairs plural "groups" with singular "is". Option4 wrongly pairs plural "groups" with singular "was".

Q19 MCQ Hard 1 pt

Choose the correct option for the sentence:
_____ the rain, they continued their journey.

A. Despite ✓

B. Although

C. Because

D. If

EXPLANATION
"Despite" means "in spite of," which fits the meaning.

Q20 MCQ Hard 1 pt

Fill in the blank with the appropriate word:
The committee has decided to ____ the proposal until further notice.

A. approve

B. reject

C. delay ✓

D. discuss

EXPLANATION
"Until further notice" indicates a pause → delay is correct.

Q21 MCQ Hard 1 pt

Choose the correct option:

I can't understand ____ you said in the meeting.

A. what ✓

B. that

C. who

D. which

EXPLANATION

The missing word introducing the clause is what.

Q22 MCQ Hard 1 pt

Choose the word that best completes the sentence:

He was criticized for his ____ response, which had no bearing on the problem that was raised.

A. quick

B. slow

C. appropriate

D. irrelevant ✓

EXPLANATION

"Irrelevant" means not connected to the matter being discussed, which is exactly what the clause after the comma describes.

Q23 MCQ Hard 1 pt

Which of the following sentences is grammatically correct?

A. The book on the table belong to me.

B. The books on the table belongs to me.

C. The book on the table are belonging to me.

D. The books on the table belong to me. ✓

EXPLANATION
"Books" is a plural subject and takes the plural verb "belong".
A pairs the singular subject "book" with the plural verb "belong" — wrong.
B pairs the plural subject "books" with the singular verb "belongs" — wrong.
C uses the needless continuous form "are belonging" instead of simple present — wrong.
D matches subject and verb correctly, so it is the right answer.

Q24 MCQ Hard 1 pt

Choose the correct preposition for the blank:
She was afraid _____the dark

A. of ✓

B. for

C. to

D. from

EXPLANATION
Correct preposition with “afraid” is of.

Q25 MCQ Hard 1 pt

Choose the word that best completes the sentence:
She was a ____ person who always tried to help others.

A. Selfish

B. Generous ✓

C. Mean

D. Arrogant

EXPLANATION
A helpful person is generous.

Q26 MCQ Hard 1 pt

Select the correct form of the verb:
She ____ a book when I called her.

A. is reading

B. was reading ✓

C. read

D. has read

EXPLANATION
Past action happening at that moment → was reading.

Q27 MCQ Hard 1 pt

Identify the sentence that is correctly punctuated:

A. I want to go to the store, but I don't have enough money. ✓

B. I want to go, to the store but I don't have enough money.

C. I want to go to, the store but I don't have enough money.

D. I want to go, to the store, but I don't have enough money.

EXPLANATION
A compound sentence needs a comma before "but". Only option A follows this rule.

Q28 MCQ Hard 1 pt

Find the synonym of the word "SERENE".

A. Agitated

B. Calm ✓

C. Turbulent

D. Chaotic

EXPLANATION
"Serene" means peaceful and quiet → Calm is the closest.

Q29 MCQ Hard 1 pt

Choose the word which best completes the sentence:
His _____behavior at the meeting caused concern among the managers.

A. Unruly ✓

B. Respectful

C. Courteous

D. Polite

EXPLANATION
"Unruly" means misbehaving or wild → fits the meaning.

Q30 MCQ Hard 1 pt

Find the error in the sentence: She is one of those persons who always makes noise in the library.

A. She is

B. one of those

C. persons

D. makes ✓

EXPLANATION
In "one of those persons who ...", the relative pronoun "who" refers to the plural "persons", so the verb must be plural: "always make noise". The error is "makes".

Q31 MCQ Hard 1 pt

Fill in the blank with the correct word:
She was very tired, _____ she decided to take a break.

A. and

B. but

C. so ✓

D. for

EXPLANATION
Cause → effect. "So" fits naturally.

Q32 MCQ Hard 1 pt

Choose the most appropriate word to complete the sentence:

The children ____ playing outside when it started to rain.

A. were ✓

B. was

C. is

D. are

EXPLANATION
Past continuous action → were playing.

Q33 MCQ Hard 1 pt

Select the correct sentence:

A. Neither the manager nor his assistants was available for comment.

B. Neither the manager nor his assistants were available for comment. ✓

C. Neither the manager nor his assistants is available for comment.

D. Neither the manager nor his assistants has been available for comment.

EXPLANATION
With "neither...nor" the verb agrees with the nearer subject. "Assistants" is plural, so a plural verb is needed: "were". The other options use singular verbs (was, is, has been).

Q34 MCQ Hard 1 pt

Choose the word that is most opposite in meaning to the word "ELOQUENT".

A. Fluent

B. Inarticulate ✓

C. Expressive

D. Smooth

EXPLANATION
“Eloquent” means fluent and expressive; the opposite is Inarticulate (not able to speak clearly).

Q35 MCQ Hard 1 pt

Choose the word that is most similar in meaning to the word "ABUNDANT".

A. Scarce

B. Rare

C. Plenty ✓

D. Insufficient

EXPLANATION
"Abundant" means "in large quantity," which matches Plenty.

TECHNICAL ABILITY (10 questions)

Q36 MCQ Hard 1 pt

A train 120 meters long is running at a speed of 72 km/h. How much time will it take to pass a platform 200 meters long?

A. 10 seconds

B. 16 seconds ✓

C. 15 seconds

D. 20 seconds

EXPLANATION
Train 120 m, platform 200 m → distance = 120 + 200 = 320 m. Speed 72 km/h → convert to m/s: 72 × (1000/3600) = 72 × (5/18) = (72 ÷ 18) × 5 = 4 × 5 = 20 m/s.
Time = distance / speed = 320 ÷ 20 = 16 seconds.

Q37 MCQ Hard 1 pt

A sum of money amounts to ₹1200 in 2 years at a simple interest rate of 10% per annum. What is the principal amount?

A. ₹1000 ✓

B. ₹1100

C. ₹900

D. ₹950

EXPLANATION
A = P(1 + rt/100) = P(1 + 10×2/100) = P(1 + 0.20) = 1.2P ⟶ P = 1200 ÷ 1.2 = ₹1000.

Q38 MCQ Hard 1 pt

Two trains start from cities A and B simultaneously, travelling towards each other. The train from A travels at 60 km/h and the train from B at 90 km/h. They meet after 2 hours. After meeting, the train from A takes how many more hours to reach B?

A. 2 hours

B. 2.5 hours

C. 3 hours ✓

D. 4 hours

EXPLANATION
Distance between A and B = (60 + 90) × 2 = 300 km.
At the meeting point, train from A has covered 60 × 2 = 120 km.
Remaining distance for train A = 300 - 120 = 180 km.
Time = 180 / 60 = 3 hours.

Q39 MCQ Hard 1 pt

A sum of ₹12,000 is invested at 10% per annum compounded annually. What is the compound interest after 2 years?

A. ₹2,000

B. ₹2,400

C. ₹2,520 ✓

D. ₹2,640

EXPLANATION
Principal P = ₹12,000, Rate r = 10%, Time n = 2 years.
Amount = $P(1 + r/100)^n$ = $12000 \times (1.1)^2$ = 12000×1.21 = ₹14,520.
Compound Interest = 14,520 - 12,000 = ₹2,520.

Q40 MCQ Hard 1 pt

A student scored 80 marks out of 100 in his first exam and 90 marks out of 120 in his second exam. By what percent (relative to the first exam's percentage) did his performance decrease?

A. 5%

B. 6.25% ✓

C. 10%

D. 4%

EXPLANATION
First exam: 80%. Second exam: 90/120 = 75%. Decrease = 5 percentage points. Relative to the first percentage: (5/80) x 100 = 6.25%.

Q41 MCQ Hard 1 pt

A shopkeeper sells an article at a profit of 25%. If the cost price of the article is ₹200, what is the selling price?

A. ₹250 ✓

B. ₹275

C. ₹225

D. ₹240

EXPLANATION
SP = 200 × (1 + 25/100) = 200 × 1.25 = ₹250.

Q42 MCQ Hard 1 pt

A can do a work in 8 days and B can do the same work in 12 days. How long will they take to complete the work if they work together?

A. 4.8 days ✓

B. 6 days

C. 5 days

D. 7 days

EXPLANATION
Rate = 1/8 + 1/12 = (3/24 + 2/24) = 5/24 work/day → time = 1 ÷ (5/24) = 24/5 = 4.8 days.

Q43 MCQ Hard 1 pt

A vessel contains a mixture of milk and water in the ratio 5:3. If 16 litres of the mixture is taken out and 16 litres of milk is added, the ratio becomes 9:3. What is the total volume of the original mixture?

A. 48 litres ✓

B. 64 litres

C. 72 litres

D. 56 litres

EXPLANATION

Let total original mixture = x litres. Milk = 5x/8, Water = 3x/8.
After removing 16 litres (in ratio 5:3): Milk removed = 10L, Water removed = 6L.
Then 16 litres of pure milk is added.
New milk = 5x/8 - 10 + 16 = 5x/8 + 6.
New water = 3x/8 - 6.
New ratio = 9:3 = 3:1 → (5x/8 + 6) = 3 × (3x/8 - 6).
5x/8 + 6 = 9x/8 - 18 → 24 = 4x/8 → x = 48 litres.

Q44 MCQ Hard 1 pt

A father is three times as old as his son. After 10 years, he will be twice as old as his son. What is the present age of the father?

A. 30 years ✓

B. 25 years

C. 35 years

D. 40 years

EXPLANATION

Let son = x → father = 3x. After 10: 3x + 10 = 2(x + 10)
3x + 10 = 2x + 20 → x = 10 → father = 3×10 = 30.

Q45 MCQ Hard 1 pt

Find the next number in the series:
3, 8, 15, 24, 35, 48, _____?

A. 60

B. 63 ✓

C. 72

D. 65

EXPLANATION
The differences between consecutive terms are: 5, 7, 9, 11, 13, 15...
Each difference increases by 2.
3+5=8, 8+7=15, 15+9=24, 24+11=35, 35+13=48, 48+15=63.
So the next number is 63.

REASONING ABILITY (15 questions)

Q46 MCQ Hard 1 pt

Study the following information carefully to answer the questions. A, B, C, D, E, F, and G are seated in a straight line facing north but not necessarily in the same order. Only three people sit between F and A. Neither F nor A sits at the extreme ends of the line. Only two people sit between A and G. E is not an immediate neighbor of either A or F. E sits third to the left of B. B is not an immediate neighbor of A. E is not an immediate neighbor of C. Who are the immediate neighbours of A?

A. BG

B. CD ✓

C. GD

D. EF

EXPLANATION
The only seating that fits all conditions is: C, A, D, E, G, F, B (left → right). So A's immediate neighbours are C and D.

Q47 MCQ Hard 1 pt

Please select the right set of logically related combination :

A. Some painters are farmers, and some are not.

B. Raman is a farmer.

C. All painters are choreographers.

D. Raman its a painter.

E. Some farmers are choreographers.

A. BAD

B. CDE

C. ACE ✓

D. DAB

EXPLANATION

From C, every painter is a choreographer. From A, some painters are farmers. So those "some painters" are both farmers and choreographers → E follows. The three are logically linked.

Q48 MCQ Hard 1 pt

Frequency of any observation can't be _____.

A. 3

B. 2.5 ✓

C. 22

D. 5

EXPLANATION

Frequency counts how many times an observation occurs — it must be a whole number (0,1,2,...). 2.5 is not possible.

Q49 MCQ Hard 1 pt

Direction: The question below consists of a question and two statements numbered I and II given, You have to decide whether the data provided in which of the statements are sufficient to answer the question. Choose your answer from the options based on this.
Six friends, L, M, N, O, P and Q are sitting in a row facing north. What is the position of Q with respect to the position of P?
I. L is sitting fourth to the right of M whose only neighbour is Q.
II. O is sitting second to the right of P.

A. The data in statement I alone is sufficient to answer the question while the data in statement II alone is not sufficient to answer the question.

B. The data in statement II alone is sufficient to answer the question while the data in statement I alone is not sufficient to answer the question.

C. The data either in statement I alone or in statement II alone is sufficient to answer the question.

D. The data in both statements I and II together is necessary to answer the question. ✓

EXPLANATION
From Statement I, we can place M at one end, Q next to M, and L four seats to the right.
This fixes only three positions and P can still sit in many places.
So I alone is not enough.
From Statement II, P and O are two seats apart, but we still don't know anything about Q's position.
So II alone is not enough.
But when we combine both, only one seating arrangement becomes possible.
This gives an exact fixed position for P and Q, so we can answer the question.

Q50 MCQ Hard 1 pt

In the question below, two statements are given, followed by two conclusions, I and II. You have to consider the statement to be true even if it seems to be at variance from commonly known facts. You have to decide which of the given conclusions, if any, follows from the given statements.
Statements:
Some A are B.
No B is C.

Conclusions:
I) Some B are C.
II) All A being C is a possibility

A. Both conclusion I and II follow.

B. Neither conclusion I nor II follow. ✓

C. Only conclusion I follows.

D. Only conclusion II follows.

EXPLANATION
From the statements:
- Some A are B.
- No B is C.

Now check the conclusions:
Conclusion I: "Some B are C."
This is directly opposite to the statement "No B is C."
So this conclusion is definitely wrong.
Conclusion II: "All A being C is a possibility."
Since some part of A is inside B, and B can never touch C, that part of A can never become C.
So A can never be fully inside C.
Therefore, this conclusion is also not possible.
So both conclusions are wrong.

Q51 MCQ Hard 1 pt

The median of the data 7, 10, 6, 72, 83, 60, 12, 5 is ____.

A. 10

B. 11 ✓

C. 12

D. 33.5

EXPLANATION
Arrange in order: 5, 6, 7, 10, 12, 60, 72, 83. There are 8 values, so the median is the mean of the 4th and 5th values: (10 + 12)/2 = 11.

Q52 MCQ Hard 1 pt

Direction: The question below consists of a question and two statements numbered I and II given, You have to decide whether the data provided in which of the statements are sufficient to answer the question. Choose your answer from the options based on this.
How is C related to D?
I. A is the only son of C who is the father of E.
II. E is the sister of A and mother of D.

A. The data in statement I alone is sufficient to answer the question while the data in statement II alone is not sufficient to answer the question.

B. The data in statement II alone is sufficient to answer the question while the data in statement I alone is not sufficient to answer the question.

C. The data in both statements I and II together is necessary to answer the question. ✓

D. The data either in statement I alone or in statement II alone is sufficient to answer the question.

EXPLANATION
Statement I: A is the only son of C, and C is the father of E. So E is a child of C and sister/brother of A. Statement I alone does not link D.
Statement II: E is the sister of A and the mother of D. This alone does not say anything about C.
Together: C is the father of E, and E is the mother of D, so C is the grandfather of D. Both statements are required.

Q53 MCQ Hard 1 pt

In the question below, two statements are given, followed by two conclusions, I and II. You have to consider the statement to be true even if it seems to be at variance from commonly known facts. You have to decide which of the given conclusions, if any, follows from the given statements.
Statements:
No car is green.
Some trains are green.
Conclusion:
I. No green is car.
II. Some trains are car

A. Both conclusion I and II follow.

B. Neither conclusion I nor II follow.

C. Only conclusion I follows. ✓

D. Only conclusion II follows.

EXPLANATION
"No car is green"
This means cars and green things do not overlap.
So the reverse statement "No green is car" is also true.
Conclusion I follows.
"Some trains are green"
Trains and green things overlap, but cars do not overlap with green things.
This gives no link between trains and cars.
Therefore we cannot say any train is a car.
Conclusion II does NOT follow.

Q54 MCQ Hard 1 pt

Direction: The question below consists of a question and two statements numbered I and II given. You have to decide whether the data provided in which of the statements are sufficient to answer the question. Choose your answer from the options based on this.

Among persons S, T, U, V, W and B who is the tallest?

I. U is taller than only two persons. T is taller than S but not the tallest. W is taller than only B.

II. S is shorter than only two persons. W is taller than B but shorter than U. U is shorter than S. T is shorter than V

A. The data in statement I alone is sufficient to answer the question while the data in statement II alone is not sufficient to answer the question.

B. The data in statement II alone is sufficient to answer the question while the data in statement I alone is not sufficient to answer the question.

C. The data either in statement I alone or in statement II alone is sufficient to answer the question. ✓

D. The data in both statements I and II together is necessary to answer the question.

EXPLANATION

Statement I: U is taller than only two persons, so U is 4th tallest. W is taller than only B, so W is 5th and B is 6th. T is taller than S and is not the tallest, so among the remaining ranks 1, 2, 3: T = 2, S = 3 and V = 1. V is the tallest.

Statement II: S is shorter than only two persons, so S is 3rd. U is shorter than S, and W is taller than B but shorter than U, so U = 4, W = 5, B = 6. T is shorter than V, so V = 1 and T = 2. V is the tallest.

Either statement alone is sufficient.

Q55 MCQ Hard 1 pt

In the question below, three statements are given, followed by two conclusions, I and II. You have to consider the statement to be true even if it seems to be at variance from commonly known facts. You have to decide which of the given conclusions, if any, follows from the given statements.
Statements:
All shoes are legs. Some legs are pairs.
Some pair are hands.
Conclusions:
I. Some hands are shoes.
II. Some pairs are shoes.

A. Only conclusion II follows.

B. Only conclusion I follows.

C. Both conclusion I and II follow.

D. Neither conclusion I nor II follow. ✓

EXPLANATION
Let's analyze:
- All shoes ⟶ legs.
- Some legs ⟶ pairs (but we don't know if those specific legs include shoes).
- Some pairs ⟶ hands.

There is no definite connection between shoes and hands, or between shoes and pairs.
The "some legs are pairs" does not guarantee that the legs that are shoes are among those pairs.
Therefore:
- Conclusion I (Some hands are shoes): Not guaranteed → Does NOT follow.
- Conclusion II (Some pairs are shoes): Also not guaranteed → Does NOT follow.

Hence neither follows → Option 4.

Q56 MCQ Hard 1 pt

The range of the data 7, 10, 6, 72, 83, 60, 12, 5 is _____.

A. 78

B. 85

C. 72

D. 83

EXPLANATION

Range = Maximum value – Minimum value

Max = 83

Min = 5

Range = 83 – 5 = 78

Q57 MCQ Hard 1 pt

Direction: The question below consists of a question and two statements numbered I and II given. You have to decide whether the data provided in which of the statements are sufficient to answer the question. Choose your answer from the options based on this.

What is the code for the word 'COLD'?.

I. The code for the word 'ROLE' is 18,15,12,5.

II. The code for the word 'ART' is 1,18,20.

A. The data in statement I alone is sufficient to answer the question while the data in statement II alone is not sufficient to answer the question.

B. The data in both statements I and II together is necessary to answer the question.

C. The data in statement II alone is sufficient to answer the question while the data in statement I alone is not sufficient to answer the question.

D. The data either in statement I alone or in statement II alone is sufficient to answer the question.

EXPLANATION

Each statement shows the code equals the alphabetical position of each letter.

- From I: ROLE → 18,15,12,5 (R=18, O=15, L=12, E=5) — confirms letter → position rule.
- From II: ART → 1,18,20 (A=1, R=18, T=20) — also confirms the same rule.

So code for COLD is:

C = 3, O = 15, L = 12, D = 4 → 3, 15, 12, 4.

Q58 MCQ Hard 1 pt

The question below consists of a question and two statements numbered I and II given, You have to decide whether the data provided in which of the statements are sufficient to answer the question. Choose your answer from the options based on this.
Z is in which direction with respect to T?
I) T is south of A & south east of B.
II) Z is east of B & A.

A. The data in statement I alone is sufficient to answer the question while the data in statement II alone is not sufficient to answer the question.

B. The data in statement II alone is sufficient to answer the question while the data in statement I alone is not sufficient to answer the question.

C. The data either in statement I alone or in statement II alone is sufficient to answer the question.

D. The data in both statements I and II together is necessary to answer the question. ✓

EXPLANATION
From (I) we know relative positions of A, B and T: T is south of A (so A is north of T) and T is southeast of B (so B is northwest of T). That places A and B both to the north of T (and B to the northwest of T). From (II) Z is east of both A and B — therefore Z lies to the east of those northern points. Combining both facts places Z to the northeast of T. Neither statement alone is enough: (I) doesn't tell where Z is, and (II) alone gives Z relative to A and B but not where A and B are relative to T. Hence both are required.

Q59 MCQ Hard 1 pt

For the (continuous) class interval 72 - 93, the class width is ____.

A. 20

B. 21 ✓

C. 93

D. 72

EXPLANATION
Class width (conventionally for continuous class intervals) = upper limit − lower limit = 93 − 72 = 21.

Q60 MCQ Hard 1 pt

In the class interval 13-23, 23 is known as _____.

A. Frequency

B. Class width

C. Upper class limit

D. Lower class limit

EXPLANATION

In a class interval written as lower–upper the first number (13) is the lower class limit and the second number (23) is the upper class limit.
